

# BNY Mellon Brings the Latest in ETF Solutions

## The BNY Mellon ETF Difference – Choice, Quality and Experience.

- 1 BNY Mellon's ETFs are designed to offer a compelling alternative to those in the market today across both indexed and actively-managed solutions.
- 2 Our index ETFs are built to track their respective indices, utilizing a variety of investment tools and techniques to minimize tracking error, reduce transaction costs and maximize efficiency. Two of these funds are offered at a market-leading price point. The BNY Mellon US Large Cap Core Equity ETF and BNY Mellon Core Bond ETF are zero-fee\* ETFs in the largest equity and fixed income US market categories offered to investors without fee waivers or other restrictions, providing investors the benefits that lower expenses can have on their long-term returns.
- 3 BNY Mellon is committed to the strength of our intellectual capital. The introduction of new actively-managed ETFs enable us to make some of the leading strategies from across our investment specialist firms available to a broader range of investors.

### BNY Mellon Active ETFs

Name	Ticker / Cusip	Index	Investment Objective	Investment Manager	Total Expense Ratio <sup>1</sup>	Inception Date

---

**Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. To obtain a prospectus, or a summary prospectus, if available, that contains this and other information about a fund, contact your financial professional or visit [im.bnymellon.com/etf](https://im.bnymellon.com/etf). Read the prospectus carefully before investing.**

ETF shares are listed on an exchange, and shares are generally purchased and sold in the secondary market at market price. At times, the market price may be at a premium or discount to the ETF's per share NAV. In addition, ETFs are subject to the risk that an active trading market for an ETF's shares may not develop or be maintained. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions.

**ETFs trade like stocks, are subject to investment risk, including possible loss of principal. The risks of investing in ETFs typically reflect the risks associated with the types of instruments in which the ETF invests. Diversification cannot assure a profit or protect against loss.**

### RISKS

**Equities** are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with **emerging market countries**. **Bonds** are subject to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **High yield bonds** involve increased credit and liquidity risk than higher-rated bonds and are considered speculative in terms of the issuer's ability to pay interest and repay principal on a timely basis. **Small and mid-sized company stocks** tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories. A fund's incorporation of **ESG considerations** into its investment approach may cause it to make different investments than funds that invest in equity or fixed income securities of companies that do not integrate consideration of environmental, social or governance issues when selecting investments. Under certain economic conditions, this could cause the fund to underperform funds that do not incorporate ESG considerations. The incorporation of ESG considerations may affect the fund's exposure to certain sectors and/or types of investments, and may adversely impact the fund's performance depending on whether such sectors or investments are in or out of favor in the market. For a fund which invests significantly in companies that are engaged in the **infrastructure business**, the fund is more susceptible to adverse economic, regulatory, political, legal and other changes affecting such companies. Infrastructure companies are subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, costs associated with environmental and other regulations, difficulty in raising capital in adequate amounts on reasonable terms in periods of high inflation or unsettled capital markets, the effects of economic slowdown and surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies, service interruption due to environmental, operational or other mishaps, and other factors. **BNY Mellon Innovators ETF:** There can be no assurance that a company identified as an innovation-driven company by Newton will ultimately introduce a new product or service or that such product or service may not be significantly delayed or have the affect Newton anticipated. The returns on a portfolio of securities that are viewed by Newton as innovation-driven companies may trail the returns of a portfolio that is not limited to securities of innovation-driven companies. Investing only in securities of innovation-driven companies may affect the fund's exposure to certain types of investments and may adversely impact the fund's performance depending on whether such investments are in or out of favor in the market. The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors. **BNY Mellon Women's Opportunities ETF:** The fund's incorporation of Women's Opportunities considerations into its investment approach may cause the fund to make different investments than funds that invest principally in equity securities but do not incorporate Women's Opportunities considerations when selecting investments. Under certain economic conditions, this could cause the fund to underperform funds that do not incorporate Women's Opportunities considerations. The funds are non-diversified, which means that the funds may invest a relatively high percentage of its assets in a limited number of issuers. Therefore, performance may be more vulnerable to changes in the market value of a single issuer or group of issuers and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund. The **healthcare sector** is subject to government regulation and reimbursement rates, as well as government approval of products and services, which could have a significant effect on price and availability. Furthermore, the types of products or services produced or provided by healthcare companies quickly can become obsolete. In addition, companies in the healthcare sector can be significantly affected by patent expirations, pricing pressure, and product liability claims. The **information technology** sector has been among the most volatile sectors of the stock market. Information technology companies involve greater risk because their revenue and/or earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain information technology companies may have limited product lines, markets or financial resources, or may depend on a limited management group. In addition, these companies are strongly affected by worldwide technological developments, and their products and services may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of information technology stocks than it does in other sectors. Fund investments may decline dramatically in value if anticipated products or services are delayed or cancelled.

The index provider determines the composition of the index and relative weightings of the securities in the index, which is subject to change by the index provider. The index provider publishes information regarding the market value of the index.**

\*Zero-fee does not include any applicable brokerage commissions shareholders may pay for the purchase or sale of ETF shares through their broker/dealer. Please read the prospectus for additional information on expenses.

<sup>1</sup>The Total Expense Ratio is the actual fund expense ratio applicable to investors. Zero-fee means zero total annual fund operating expenses and does not include any applicable brokerage commissions shareholders may pay for the purchase or sale of ETF shares through their broker/dealer. Please see prospectus for additional information on fees.

The ETF funds will issue (or redeem) fund shares to certain institutional investors known as "Authorized Participants" (typically market makers or other broker-dealers) only in large blocks of fund shares known as "Creation Units." BNY Mellon Securities Corporation ("BNYMSC"), a subsidiary of the BNY Mellon, serves as distributor of the fund. BNYMSC does not distribute fund shares in less than Creation Units, nor does it maintain a secondary market in fund shares. BNYMSC may enter into selected agreements with Authorized Participants for the sale of Creation Units of fund shares.

Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

**The Morningstar<sup>®</sup> Emerging Markets Large Cap Index<sup>SM</sup>** is a float-adjusted market capitalization weighted index designed to measure the performance of emerging market large-capitalization stocks. A country is considered emerging if: (i) its annual per capita gross national income does not fall in the World Bank's high-income category for the most recent three years; (ii) it has had broad-based discriminatory controls against non-domiciled investors during the most recent three years; and (iii) its stock markets do not exhibit any of the following characteristics: transparency, market regulation, operational efficiency, and the absence of broad-based investment restrictions. The index's initial universe of eligible securities includes equity securities (including common stock, preferred stock and shares of REITs), issued by emerging market companies and traded on a major foreign exchange. At each reconstitution, the initial universe is screened to exclude securities

based on the number of non-trading days in the preceding quarter, monthly dollar traded value and turnover during the preceding six-month period, and market capitalization. The index includes large capitalization securities from each eligible country, targeting the top 70% of stocks by market capitalization from each eligible country. The index rebalances quarterly in March, June, September and December, and reconstitutes semi-annually in June and December. **The Morningstar® Developed Markets ex-US Large Cap Index<sup>SM</sup>** is a float-adjusted market capitalization weighted index designed to measure the performance of developed market (excluding the United States) large-capitalization stocks. A country is considered developed if it meets the following criteria: (i) its annual per capita gross national income falls in the World Bank's high-income category for the most recent three years; (ii) it has not had any broad-based discriminatory controls against non-domiciled investors for the most recent three years; and (iii) its stock markets exhibit the following characteristics: transparency, market regulation, operational efficiency, and the absence of broad-based investment restrictions. The index's initial universe of eligible securities includes equity securities (including common stock, preferred stock and shares of REITs), issued by developed market companies (excluding the United States) and traded on a major foreign exchange. At each reconstitution, the initial universe is screened to exclude securities based on the number of non-trading days in the preceding quarter, monthly dollar traded value and turnover during the preceding six-month period, and market capitalization. The index includes large capitalization securities from each eligible country, targeting the top 70% of stocks by market capitalization from each eligible country. The index rebalances quarterly in March, June, September and December, and reconstitutes semi-annually in June and December. **The Morningstar® US Large Cap Index<sup>SM</sup>** is a float-adjusted market capitalization weighted index designed to measure the performance of US large-capitalization stocks. The index's initial universe of eligible securities includes common stock, tracking stock and shares of real estate investment trusts (REITs) issued by US companies and traded on the New York Stock Exchange, NASDAQ or NYSE Market LLC. At each reconstitution, the initial universe is screened to exclude securities based on the number of non-trading days in the preceding quarter and trading volume during the preceding six-month period. The index includes the securities of companies whose cumulative total market capitalization represents approximately the top 70% of the remaining securities. The index rebalances quarterly in March, June, September and December, and reconstitutes semi-annually in June and December. **The Morningstar® US Mid Cap Index<sup>SM</sup>** is a float-adjusted market capitalization weighted index designed to measure the performance of US medium-capitalization stocks. The index's initial universe of eligible securities includes common stock, tracking stock and shares of real estate investment trusts (REITs) issued by US companies and traded on the New York Stock Exchange, NASDAQ or NYSE Market LLC. At each reconstitution, the initial universe is screened to exclude securities based on the number of non-trading days in the preceding quarter and trading volume during the preceding six-month period. The index includes the securities of companies whose cumulative total market capitalization falls approximately between the bottom 10%–30% of the remaining securities. The index rebalances quarterly in March, June, September and December, and reconstitutes semi-annually in June and December. **The Morningstar® US Small Cap Index<sup>SM</sup>** is a float-adjusted market capitalization weighted index designed to measure the performance of US small-capitalization stocks. The index's initial universe of eligible securities includes common stock, tracking stock and shares of real estate investment trusts (REITs) issued by US companies and traded on the New York Stock Exchange, NASDAQ or NYSE Market LLC. At each reconstitution, the initial universe is screened to exclude securities based on the number of non-trading days in the preceding quarter and trading volume during the preceding six-month period. The index includes the securities of companies whose cumulative total market capitalization represents approximately the bottom 3%–10% of the remaining securities. The index rebalances quarterly in March, June, September and December, and reconstitutes semi-annually in June and December. **The Bloomberg US Aggregate Total Return Index** is designed to measure the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage-backed pass-through securities (agency fixed-rate), commercial mortgage-backed securities (agency and non-agency) and other asset-backed securities having at least one year until final maturity. To be included in the index, securities must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch. **The Bloomberg US Corporate High Yield Total Return Index** is designed to measure the US dollar-denominated, high yield (junk), fixed-rate, taxable corporate bond market. Bonds included in the index must have \$150 million or more par amount outstanding and at least one year until final maturity. Bonds are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Securities in the index are updated on the last business day of each month. **The Bloomberg US Corporate 1–5 Years Total Return Index** is designed to measure the market for investment grade, US dollar-denominated, fixed-rate, taxable corporate bonds with one to five years left to maturity. To be included in the index, securities must have \$300 million or more par amount outstanding and be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch. Securities in the index are updated on the last business day of each month. **The Bank of America Merrill Lynch 3-Month U.S. Treasury Bill Index** is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from the rebalancing date. To qualify for selection, an issue must have settled on or before the month-end rebalancing date. The **S&P 500®** Index is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization. The **MSCI Emerging Markets Index** is a free float-adjusted market capitalization-weighted index that is designed to measure equity market performance of emerging markets. The **MSCI EAFE Index** (Europe, Australasia, Far East) is a free float-adjusted, market capitalization-weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. Reflects reinvestment of net dividends and, where applicable, capital gain distributions. The **ICE Bank of America US Corporate Index** is an unmanaged index comprised of U.S. dollar denominated investment grade corporate debt securities publicly issued in the U.S. domestic market with at least one year remaining term to final maturity. The **S&P Global Infrastructure Index** is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability. To create diversified exposure, the index includes three distinct infrastructure clusters: energy, transportation, and utilities. An investor cannot invest directly in any index. The **Russell 3000® Growth Index** measures the performance of the broad growth segment of the U.S. equity universe. It includes those Russell 3000 companies with relatively higher price-to-book ratios, higher forecasted growth rates and higher sales per share historical growth. The index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

"Newton" and/or the "Newton Investment Management" refers to Newton Investment Management Limited, and Newton Investment Management North America LLC. Newton is incorporated in the United Kingdom and is authorized and regulated by the Financial Conduct Authority in the conduct of investment business. Newton is registered with the U.S. Securities and Exchange Commission (SEC) as an investment adviser. Newton is a subsidiary of The Bank of New York Mellon Corporation.

Walter Scott & Partners Limited ("Walter Scott") is an investment management firm authorized and regulated in the United Kingdom by the Financial Conduct Authority in the conduct of investment business. Walter Scott is a subsidiary of The Bank of New York Mellon Corporation.

Mellon Investments Corporation (MIC) is a registered investment adviser and subsidiary of The Bank of New York Mellon Corporation (BNY Mellon). MIC is composed of two divisions: Mellon, which specializes in index management, and Dreyfus, which specializes in cash management and short duration strategies. Dreyfus is also a division of BNY Mellon Investment Adviser, Inc. (BNYMIA), a registered investment adviser.

Investment advisory services in North America are provided by Insight North America LLC, a registered investment adviser and regulated by the U.S. Securities and Exchange Commission (SEC). Insight North America LLC is associated with other global investment managers that also (individually and collectively) use the corporate brand Insight Investment and may be referred to as "Insight" or "Insight Investment." Insight is a subsidiary of the Bank of New York Mellon Corporation.

"Bloomberg®" and Bloomberg U.S. Aggregate Bond, Bloomberg US Corporate High Yield Total Return Index and Bloomberg US Corporate 1-5 Years Total Return Index are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by BNY Mellon ETF Investment Adviser LLC. Bloomberg is not affiliated with BNY Mellon ETF Investment Adviser LLC and Bloomberg does not approve, endorse, review, or recommend BNY Mellon Core Bond ETF, BNY Mellon High Yield Beta ETF or BNY Mellon Short Duration Corporate Bond ETF. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to BNY Mellon Core Bond ETF, BNY Mellon High Yield Beta ETF or BNY Mellon Short Duration Corporate Bond ETF.

BNY Mellon Investment Management is one of the world's leading investment management organizations, encompassing BNY Mellon's affiliated investment management firms and global distribution companies. BNY Mellon is the corporate brand of The Bank of New York Mellon Corporation and may also be used as a generic term to reference the corporation as a whole or its various subsidiaries generally. BNY Mellon ETF Investment Adviser, LLC is the investment adviser and BNY Mellon Securities Corporation is the distributor of the ETF funds, both are subsidiaries of BNY Mellon.
