Growth of a \$10,000 Investment

A hypothetical \$10,000 investment in the fund's Class A shares on 12/31/86 would have been worth \$51,704 on 9/30/23.

This does not reflect the 4.50% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Data assumes the reinvestment of dividends and capital gains, if any. Performance for periods less than 1 year is not annualized. Go to im.bnymellon.com for the fund's most recent month-end returns. Total Expense Ratios: Class A 0.88%, Class C 1.67%, Class I 0.65%, Class Y 0.65%. Net Expense Ratios: Class A 0.85%, Class C 1.60%, Class I 0.60%, Class Y 0.60%. The net expense ratio(s) reflect a contractual expense reduction agreement through 3/31/2024, without which, the returns would have been lower. The Net Expenses is the actual fund expense ratio applicable to investors. ¹SEC 30-day yields reflect undertaking in effect, without which the Fund's SEC 30-day yield for Class A, Class C, Class I and Class Y shares would have been 3.43%, 2.78%, 3.85% and 3.95%, respectively, as of 9/30/2023. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

¹The total return performance figures for Class Y shares of the fund represent the performance of the fund's Class A shares for periods prior to 07/01/13, the inception date for Class Y shares and the performance of Class Y shares, from that inception date. Performance reflects the applicable class's sales load and distribution/servicing fees since the inception date. Had these fees and expenses been reflected for periods prior, performance would have been different. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, anticipated holding period and other relevant factors. ²Portfolio composition is as of 9/30/2023 and is subject to change at any time. ³Average Effective Maturity is the weighted average of the effective maturity dates of the fixed-income securities in the fund's holdings. ⁴Modified Duration to Worst — Yield change calculated to the priced to worst date, including all call features. ⁵Source: FactSet. ¹Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2023 Morningstar, Inc. ²Portfolio composition is as of 9/30/2023 and is subject to change at any time. ³Bond ratings reflect the rating entity's evaluation of the issuer's ability to pay interest and repay principal on the bond on a timely basis. Bonds rated BBB/Baa or higher are considered investment grade, while bonds rated BB/Ba or lower are considered speculative as to the timely payment of interest and principal. ⁴Credit ratings reflect only those assigned by S&P, Moody's, and/or Fitch. Split-rated securities if any, are reported in the higher rating category. ⁵Source: Insight Investment.

Risks: Bonds are subject generally to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **Municipal income** may be subject to state and local taxes for out-of-state residents. Some income may be subject to the federal alternative minimum tax for certain investors. Capital gains, if any, are taxable.
