Class A **DNLDX**    Class C **DNLGX**    Class I **DNLRX**    Class Y **DNLGX**

## Goal/Approach

The fund seeks to maximize capital appreciation by normally investing at least 80% of its assets, plus any borrowings for investment purposes, in the stocks of midsized companies. The fund defines "midsized companies" as companies included in the Russell Midcap Index at the time of purchase. The fund's portfolio managers apply a systematic, quantitative investment approach designed to identify and exploit relative misvaluations primarily within mid-cap stocks in the U.S. stock market.

## Growth of a \$10,000 Investment

A hypothetical \$10,000 investment in the fund's Class A shares on 1/29/85 would have been worth \$365,531 on 9/30/23.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

The **Russell Midcap<sup>®</sup> Index** measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap<sup>®</sup> Index is a subset of the Russell 1000<sup>®</sup> Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap<sup>®</sup> Index is constructed to provide a comprehensive and unbiased barometer for the mid-cap segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap opportunity set. **Risks:** Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Small and midsized company stocks tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories.
