BNY Mellon Sustainable U.S. Equity Portfolio, Inc.

GOAL/APPROACH

The fund seeks long-term capital appreciation. To pursue this goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in stocks (or derivatives) of U.S. companies that demonstrate attractive investment attributes and sustainable business practices and have no material unresolvable environmental, social and governance (ESG) issues. The fund focuses on companies with market caps of \$5 billion or more. The fund may invest up to 20% of its assets in foreign securities, including up to 10% in emerging markets securities.

RISKS

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. The fund's share price fluctuates, sometimes dramatically, which means you could lose money.

Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. **Small and midsize company** stocks tend to be more volatile and less liquid than larger company stocks as these companies are less established and

have more volatile earnings histories. **Socially responsible portfolios** can limit the number of investment opportunities available to the portfolio which may produce more modest gains than portfolios that are not subject to such special investment considerations.
