The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Data assumes the reinvestment of dividends and capital gains, if any. Performance for periods less than 1 year is not annualized. Go to im.bnymellon.com for the fund's most recent month-end returns.

Historical Performance (Class I @ NAV)

[†]Gross expenses is the total annual operating expense ratio for the fund, before any fee waivers or expense reimbursements. ^{††}Net Expenses is the total annual operating expense ratio for the fund, after any applicable fee waivers or expense reimbursements. The net expense ratio(s) reflect a contractual expense reduction agreement through 2/1/2025, without which, the returns would have been lower. The Net Expenses is the actual fund expense ratio applicable to investors. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

¹Prior to 8/1/07, the fund invested its assets in a "master portfolio" that had the same investment objective and policies as the fund. This arrangement was terminated on 8/1/07 and the fund operates as a standalone fund. Performance information represents the performance of the predecessor master portfolio (and its predecessor fund) and the expenses of the master portfolio's predecessor fund through 1/31/03 and the fund's performance and expense structure thereafter. The master portfolio's predecessor fund contributed all of its assets to the master portfolio before the fund commenced investment operations on 2/1/03. 12/8/88 represents the inception date of the master portfolio's unregistered predecessor fund. All returns assume reinvestment of dividends and distributions. The total return performance figures for Class Y shares of the fund represent the performance of the fund's Class I shares for periods prior to 6/1/15, the inception date for Class Y shares, and the performance of Class Y from that inception date. Performance reflects the applicable class's distribution/servicing fees since the inception date. Investors should consider, when deciding to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Source: FactSet. The **MSCI EAFE Index (Europe, Australasia, Far East)** is a free float-adjusted, market capitalization-weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada.
