<sup>1</sup>The fund commenced operations after all of the assets of a predecessor mutual fund were transferred to the fund in exchange for a corresponding class of shares of the fund in a tax-free reorganization on 9/6/02. Inception date prior to 9/6/02 reflects the inception date of the predecessor fund's corresponding share classes (Class R). Performance reflects current distribution and servicing fees in effect only since 9/6/02 and includes returns for the predecessor fund, but does not reflect the predecessor fund's front-end sales load, which would have lowered returns. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. <sup>2</sup>Portfolio composition is as of 3/31/2023 and is subject to change at any time. <sup>3</sup>Average Effective Maturity is the weighted average of the effective maturity dates of the fixed-income securities in the fund's holdings. <sup>4</sup>Average Effective Duration is used to measure the market price sensitivity of the fund's portfolio holdings to changes in interest-rates. <sup>5</sup>Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. <sup>6</sup>Source: FactSet. The S&P Municipal Bond Investment Grade Intermediate Index consists of bonds in the S&P Municipal Bond Index that are rated at least BBB- by Standard & Poor's, Baa3 by Moody's or BBB- by Fitch Ratings. All bonds must also have a minimum maturity of 3 years and a maximum maturity of up to, but not including, 15 years as measured from the rebalancing date. Investors cannot invest directly in any index.

\*Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2023 Morningstar, Inc. Other share classes may have achieved different results. Ratings do not reduce investment risk and are subject to change.

<sup>1</sup>Portfolio composition is as of 3/31/2023 and is subject to change at any time. <sup>2</sup>Bond ratings reflect the rating entity's evaluation of the issuer's ability to pay interest and repay principal on the bond on a timely basis. Bonds rated BBB/Baa or higher are considered investment grade, while bonds rated BB/Ba or lower are considered speculative as to the timely payment of interest and principal. <sup>3</sup>Credit ratings reflect only those assigned by S&P, Moody's, and/or Fitch. Split-rated securities if any, are reported in the higher rating category.

**Risks:** Bonds are subject generally to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **Municipal income** may be subject to state and local taxes. Capital gains, if any, are taxable. *Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and affected certain companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those companies, industries or sectors.*
