⁶Portfolio composition is as of 3/31/2025 and is subject to change at any time.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. **Small and midsize company stocks** tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories.
