

BNY Mellon Intermediate Bond Fund

FACT SHEET
Dec 31, 2023

Class M **MPIBX** Investor Shares **MIIDX**

Goal/Approach

The fund seeks total return (consisting of capital appreciation and current income). To pursue its goal, the fund actively manages bond market and maturity exposure and invests at least 80% of its net assets, plus any borrowings for investment purposes, in bonds, such as government securities, corporate bonds and municipal securities. The fund's investments in bonds must be of investment grade (i.e., Baa/BBB or higher) quality at the time of purchase or, if unrated, deemed of comparable quality by the investment adviser. Generally, the fund's average effective portfolio maturity will be between 3 and 10 years and its average effective portfolio duration will be between 2.5 and 5.5 years.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Data assumes the reinvestment of dividends and capital gains, if any. Performance for periods of less than 1 year is not annualized. Go to im.bnymellon.com for the fund's most recent month-end returns. Total and Net Expense Ratios: Class M 0.58%, Investor Shares 0.83%. The Net Expenses is the actual fund expense ratio applicable to investors. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

¹Before the fund commenced operations on 10/2/00 (fund inception date), substantially all of the assets of a predecessor common trust fund (CTF) that, in all material respects, had the same investment objective, policies, guidelines and restrictions as the fund were transferred to the fund. The performance figures presented represent the performance of the predecessor CTF from its inception date (1/1/87) through 10/1/00, adjusted to reflect the fund's fees and expenses, by subtracting from the actual performance of the CTF the expenses of the fund's class M shares (net of any fee waivers and expense reimbursements), and the performance of the fund's Class M shares thereafter. The predecessor CTF was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions that might have adversely affected performance. ²Portfolio composition is as of 12/31/2023 and is subject to change at any time. ³Average Effective Maturity is the weighted average of the effective maturity dates of the fixed-income securities in the fund's holdings. ⁴Average Effective Duration is used to measure the market price sensitivity of the fund's portfolio holdings to changes in interest-rates. ⁵Represents the CTF Inception ⁶Source: FactSet. ¹Portfolio composition is as of 12/31/2023 and is subject to change at any time. ²Bond ratings reflect the rating entity's evaluation of the issuer's ability to pay interest and repay principal on the bond on a timely basis. Bonds rated BBB/Baa or higher are considered investment grade, while bonds rated BB/Ba or lower are considered speculative as to the timely payment of interest and principal. ³Credit ratings reflect only those assigned by S&P, Moody's, and/or Fitch. Split-rated securities if any, are reported in the higher rating category.

Risks: Bonds are subject generally to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
