¹Before the fund commenced operations on 10/2/00 (fund inception date), substantially all of the assets of a predecessor common trust fund (CTF) that, in all material respects, had the same investment objective, policies, guidelines and restrictions as the fund were transferred to the fund. The performance figures presented represent the performance of the predecessor CTF from its inception date (1/1/87) through 10/1/00, adjusted to reflect the fund's fees and expenses, by subtracting from the actual performance of the CTF the expenses of the fund's class M shares (net of any fee waivers and expense reimbursements), and the performance of the fund's Class M shares thereafter. The predecessor CTF was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions that might have adversely affected performance. ²Portfolio composition is as of 9/30/2023 and is subject to change at any time. ³Average Effective Maturity is the weighted average of the effective maturity dates of the fixed-income securities in the fund's holdings. ⁴Average Effective Duration is used to measure the market price sensitivity of the fund's portfolio holdings to changes in interest-rates. ⁵Represents the CTF Inception ⁶Source: FactSet. The S&P Municipal Bond Investment Grade Intermediate Index consists of bonds in the S&P Municipal Bond Index that are rated at least BBB- by Standard & Poor's, Baa3 by Moody's or BBB- by Fitch Ratings. All bonds must also have a minimum maturity of 3 years and a maximum maturity of up to, but not including, 15 years as measured from the rebalancing date.
