

# Cash Reserves Retirement Income Method

Insuring

## Why Should You Care?

Market volatility, if not properly managed, can be particularly damaging to retirement income plans. Cash Reserves is one method to help manage volatility.

## What's the Good News?

- › Financial advisors have a variety of methods, such as Cash Reserves, for developing retirement income plans tailored to your situation.
- › Financial advisors have sophisticated financial planning software to help model retirement accumulation, budgeting, and income distribution.

Not FDIC-Insured. Not Bank-Guaranteed. May Lose Value.

# Take Action!

## ✓ Get help

Financial Advisors tailor retirement income plans to each client's unique circumstances using and often combining a variety of methods. Cash Reserves is just one example. Meet with Your Advisor as you approach retirement to begin discussing *your* income plan.

## ✓ Simplify

Managing your investments across multiple accounts and firms and even advisors can be daunting and time-consuming. As you get closer to retirement, evaluate whether to consolidate with a trusted advisor to who can help you manage your portfolios for income.

## ✓ Consider all your resources

Social Security, pensions, rents, part-time work, and other sources of income combine with your investment income to create your total retirement paycheck.

It's Your  
**30**

Because many investors will spend around 30 years in retirement, now is the time for you and your financial professional to plan for your future. This will be the time when pressures and responsibilities that once filled your days will diminish and you'll have more time to focus on you.\*

## We believe

To achieve the retirement you desire, first **determine your retirement goals** and then work with your financial advisor to **develop a financial plan**. Discuss the four interconnected financial behaviors — earning, spending, investing and insuring — because they will greatly impact your plan.

\*The likelihood of any one individual experiencing a retirement horizon of 30+ years depends on a variety of factors including the age at retirement and health-related issues.

### All investments involve risk, including the possible loss of principal.

### Risks

**Bonds** are subject to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **Equities** are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.

The Bloomberg Barclays U.S. Aggregate Bond Index is a widely accepted, unmanaged total return index of corporate, government and government-agency debt instruments, mortgage-backed securities and asset-backed securities with an average maturity of 1 to 10 years. The Bloomberg Barclays Global Aggregate Index is an index comprised of several other Barclays indices that measure fixed income performance of regions around the world. The Standard & Poor's 500 (S&P 500) Composite Stock Price Index is a widely accepted, unmanaged index of U.S. stock market performance. The Russell 2000 Index measures the performance of the small-cap segment of the U.S. equity universe and includes approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership. The Morgan Stanley Capital International Europe, Australasia, Far East (MSCI EAFE) Index is a free float-adjusted market capitalization-weighted index that is designed to measure equity performance in developed markets excluding the United States and Canada. The index consists of 21 MSCI national developed market indices. The MSCI Emerging Markets Index captures large- and mid-cap representation across 23 emerging market countries. The FTSE NAREIT PureProperty® Index Series provides a daily measure of real estate investment performance (price returns and total returns) of unlevered property investments as well as equity investments in real estate. The values are calculated from daily stock market valuations of, and dividends paid by, stock exchange-listed U.S. equity REITs, using a patented methodology to infer property returns based on detailed information about the holdings and balance sheets of property-owning REITs. U.S. REITs own and manage high-quality properties in and around major metropolitan areas throughout the country. The FTSE NAREIT All Equity REITs Index is a free-float adjusted, market capitalization-weighted index of U.S. equity REITs. Constituents of the index include all tax-qualified REITs with more than 50% of total assets in qualifying real estate assets other than mortgages secured by real property. HFRFRI utilizes a UCITS III-compliant methodology to construct the HFRX Hedge Fund Indices. The methodology is based on defined and predetermined rules and objective criteria to select and rebalance components to maximize representation of the hedge fund universe. HFRX Indices utilize state-of-the-art quantitative techniques and analysis; multi-level screening, cluster analysis, Monte Carlo simulations and optimization techniques ensure that each index is a pure representation of its corresponding investment focus. The BofAML U.S. High Yield Master II TR Index is a commonly used benchmark index for high yield corporate bonds. It is administered by Merrill Lynch. The Master II is a measure of the broad high yield market. Investors cannot invest directly in any index.
