Class A DTGRX Class C DTGCX Class I DGVRX

Goal/Approach

The fund seeks capital appreciation. To pursue this goal, the fund normally invests at least 80% of its assets, plus any borrowings for investment purposes, in the stocks of growth companies of any size that Dreyfus believes to be leading producers or beneficiaries of technological innovation. Up to 25% of the fund's assets may be invested in foreign securities. In choosing stocks, the fund looks for technology companies with the potential for strong earnings or revenue growth rates.

THE BOSTON COMPANY
ASSET MANAGEMENT
BNY MELLON AMNA

Investment Adviser
The Dreyfus Corporation

Effective on January 31, 2018, The Boston Company Asset Management LLC (TBCAM) and Standish Mellon Asset Management Company LLC (Standish) merged into Mellon Capital Management Corporation (Mellon Capital), which immediately changed its name to BNY Mellon Asset Management North America Corporation.

Growth of a \$10,000 Investment¹

A hypothetical \$10,000 investment in the fund's Class A shares on 10/13/97 would have been worth \$70,595 on 6/30/18.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

Risks

Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. **Small and midsized company stocks** tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories. The **technology sector** involves special risks, such as the faster rate of change and obsolescence of technological advances, and has been among the most volatile sectors of the stock market.
