Growth of a \$10,000 Investment

A hypothetical \$10,000 investment in the fund's Class A shares on 6/28/96 would have been worth \$44,892 on 6/30/18.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

¹The total return performance figures presented for Class C and Class I shares of the fund represent the performance of the fund's Class A shares for periods prior to 11/15/02, the inception date for Class C and Class I shares, and the performance of Class C and I, respectively, from that inception date. Performance reflects the applicable class' sales load and distribution/servicing fees since the inception date. Had these fees and expenses been reflected for periods prior, performance would have been lower. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 6/30/18 and is subject to change at any time. ³Redemption Fee on all shares redeemed within 60 days of purchase. This fee is retained by the fund. (Not charged on shares sold through Auto Withdrawal or Auto-Exchange, or on shares acquired through dividend reinvestment.) Please see the fund's SAI for more details. ⁴Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁵Source: FactSet.
