

Dreyfus Inflation Adjusted Securities Fund

Jun 30
2018

Class I DIASX Class Y DAIYX

Goal/Approach

The fund seeks returns that exceed the rate of inflation.

Accordingly, the fund normally invests at least 80% of its assets, plus any borrowings for investment purposes, in inflation-indexed securities. These are fixed-income securities designed to protect investors from a loss of value due to inflation by periodically adjusting their principal and/or coupon according to the rate of inflation. The fund primarily invests in high-quality U.S. dollar-denominated inflation-indexed securities. However, the fund may invest in foreign currency-denominated inflation-protected securities and other fixed-income securities not adjusted for inflation. The fund seeks to keep the average effective duration of its portfolio at two to ten years.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Funds with less than 1 year's history, year-to-date and 3 month performance are not annualized. Go to Dreyfus.com for the fund's most recent month-end returns. Total Expense Ratios: Class I 0.51%, Class Y 0.43%.

¹The total return performance figures presented for Class Y shares of the fund represent the performance of the fund's Class I shares for periods prior to 7/1/13, the inception date for Class Y shares, and the performance of Class Y shares from that inception date. Performance reflects the applicable class' distribution/servicing fees since the inception date. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 6/30/18 and is subject to change at any time. ³Duration is a measure of volatility expressed in years. The higher the number, the greater the potential for volatility as interest rates change. ⁴Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁵Source: FactSet. Reflects investments of dividends and, where applicable, capital gain distributions. This index consists of U.S. Treasury Inflation Protected Securities issued by the U.S. Treasury that have maturities ranging from 1 to 10 years. Each security has at least \$250 million par amount outstanding, publicly issued, dollar-denominated, non-convertible, fixed-rate, and rated investment grade (Moody's Baa3 or better). Investors cannot invest directly in any index.

PORTFOLIO MANAGEMENT

The fund's investment adviser is The Dreyfus Corporation (Dreyfus). Investment decisions for the fund are made by a team of portfolio managers from BNY Mellon Asset Management North America Corporation (the "firm"), an affiliate of Dreyfus. The team members are Robert Bayston and Nate Pearson, CFA, each of whom also is an employee of Dreyfus. Mr. Bayston has been a primary portfolio manager of the fund since January 2005 and is responsible for treasury inflation protected securities and derivative strategies with the firm. Mr. Pearson has been a primary portfolio manager of the fund since July 2012 and is an interest rate and derivatives strategist responsible for researching U.S. Government securities at the firm. BNY Mellon Asset Management North America Corporation investment professionals manage Dreyfus-managed funds pursuant to a dual-employee arrangement, under Dreyfus' supervision, and apply their firm's proprietary investment process in managing the funds.

Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. To obtain a prospectus, or a summary prospectus, if available, that contains this and other information about a Dreyfus fund, contact your financial advisor or visit dreyfus.com. Read the prospectus carefully before investing. Investors should discuss with their advisor the eligibility requirements for Class I and Y shares, which are available only to certain eligible investors, and the historical results achieved by the fund's respective share classes.

The Dreyfus Corporation and MBSC Securities Corporation are affiliated with The Bank of New York Mellon Corporation.

Risks

Bonds are subject to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **Inflation-linked bonds (ILBs)** issued by a government are fixed-income securities whose principal value is periodically adjusted according to the rate of inflation; ILBs decline in value when real interest rates rise. Treasury Inflation-Protected Securities (TIPS) are ILBs issued by the U.S. Government.
