

# Dreyfus Structured Midcap Fund

Jun 30  
2018

Class I DPSRX    Class Y DPSYX

*Goal/Approach*

The fund seeks long-term capital growth. To pursue this goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in the stocks of companies included in the S&P MidCap 400 Index or the Russell Midcap Index at the time of purchase.

The portfolio managers select stocks through a "bottom-up" approach that seeks to identify undervalued securities using a quantitative screening process. This process is driven by a proprietary quantitative model that measures a diverse set of characteristics of stocks to identify and rank stocks.

Total Expense Ratios: Class I 1.03%, Class Y 0.86%. Net Expense Ratios: Class I 1.00%, Class Y 0.86%.

<sup>1</sup>The total return performance figures for Class Y of the fund represent the performance of the fund's Class A shares for periods prior to 7/1/2013, the inception date for Class Y shares, and the performance of Class Y from that inception date. Performance reflects the applicable class' distribution/servicing fees since the inception date. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, anticipated holding period and other relevant factors. <sup>2</sup>Portfolio composition is as of 6/30/18 and is subject to change at any time. <sup>3</sup>Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. <sup>4</sup>Source: FactSet. The S&P MidCap 400 Index provides investors with a benchmark for mid-sized companies. The index measures the performance of mid-sized companies, reflecting the distinctive risk and return characteristics of this market segment. Investors cannot invest directly in any index. <sup>5</sup>Source: FactSet: The Russell Midcap Index measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap Index is a subset of the Russell 1000 Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap Index represents approximately 31% of the total market capitalization of the Russell 1000 companies. The Russell Midcap Index is constructed to provide a comprehensive and unbiased barometer for the mid-cap segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap opportunity set. Investors cannot invest directly in any index.
