Class I GPNIX Class Y GPNYX

Goal/Approach

The fund seeks to maximize total return, consisting of capital appreciation and current income. To pursue its goal, the fund normally invests at least 80% of its net assets in mortgage-related securities. These mortgage-related securities may include certificates issued, and guaranteed as to timely payment of principal and interest, by the Government National Mortgage Association (GNMA); securities issued by government-related organizations such as Fannie Mae and Freddie Mac; residential and commercial mortgage-backed securities issued by governmental agencies or private entities; and collateralized mortgage obligations (CMOs). The fund will invest at least 65% of its net assets in Ginnie Maes. The fund can invest in privately issued mortgage-backed securities with a "BBB" or higher credit quality, but currently intends to invest in only those securities with an "A" or higher credit quality.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Funds with less than 1 year's history, year-to-date and 3 month performance are not annualized. Go to Dreyfus.com for the fund's most recent month-end returns. Total Expense Ratios: Class I 0.85%, Class Y 0.71%.

As of 11/1/17, the fund's investment strategy changed and the fund's name changed to Dreyfus U.S. Mortgage Fund.

¹The total return performance figures for Class I and Class Y shares of the fund represent the performance of the fund's Class Z Shares for periods prior to 8/31/16 and 9/1/15, the inception dates for Class I and Y shares, respectively, and the performance of Class I and Y, respectively, from those inception dates. Performance reflects the applicable class' distribution/servicing fees since the inception date. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 6/30/18 and is subject to change at any time. ³Duration is a measure of volatility expressed in years. The higher the number, the greater the potential for volatility as interest rates change. ⁴Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁵Source: FactSet. The Bloomberg Barclays U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and nonagency). Investors cannot invest directly in any index.

Main Risks

Bonds are subject to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **Mortgage-backed securities:** Ginnie Maes and other securities backed by the full faith and credit of the United States are guaranteed only as to the timely payment of interest and principal when held to maturity. The market prices for such securities are not guaranteed and will fluctuate. Privately issued mortgage related securities also are subject to credit risks associated with the underlying mortgage properties. These securities may be more volatile and less liquid than more traditional, government backed debt securities.
