Growth of a \$10,000 Investment¹

A hypothetical \$10,000 investment in the fund's Class A shares on 7/10/06 would have been worth \$18,604 on 6/30/18.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Funds with less than 1 year's history, year-to-date and 3 month performance are not annualized. Go to Dreyfus.com for the fund's most recent month-end returns. The net expense ratio(s) reflect a contractual expense reduction agreement through 02/01/2019. Total Expense Ratios: Class A 1.79%, Class C 2.83%, Class I 1.46%. Net Expense Ratios: Class A 1.79%, Class C 2.81%, Class I 1.46%.

¹On 3/31/09 existing shares were designated Class I shares and the fund began to offer Class A and C shares. The total return performance figures for Class A and C shares presented for periods prior to 3/31/09 reflect the performance of the fund's Class I shares, adjusted to reflect the applicable sales load for that class. Performance has not been adjusted to reflect any class-specific distribution or servicing fees or any differences in operating expenses but these fees and expenses are reflected in returns for periods after 3/31/09. Had these fees and expenses been reflected for periods prior to the fund's reorganization, performance would have been lower. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 6/30/18 and is subject to change at any time. ³Redemption Fee on all shares redeemed within 60 days of purchase. This fee is retained by the fund. (Not charged on shares sold through Auto Withdrawal or Auto-Exchange, or on shares acquired through dividend reinvestment.) Please see the fund's SAI for more details. ⁴Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁵Source: FactSet. Reflects reinvestment of net dividends and, where applicable, capital gain distributions. *Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2018 Morningstar, Inc. Risks

Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. **Small and mid-sized company stocks** tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories.
