The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Year-to-date performance is not annualized. Please go to www.bnymellon.com/bnymellonfunds for the fund's most recent month-end returns. Total Expense Ratio: Class M 0.56%.

¹ Before the fund commenced operations on 10/2/00, substantially all of the assets of a predecessor common trust fund (CTF) that, in all material respects (except as discussed in "Past Performance" of the fund's prospectus), had the same investment objective, policies, guidelines and restrictions as the fund were transferred to the fund. The performance figures presented represent the performance of the predecessor CTF through 10/1/00, adjusted to reflect the fund's fees and expenses, by subtracting from the actual performance of the CTF the expenses of the fund's Class M shares (net of any fee waivers and expense reimbursements), and the performance of the fund's Class M shares thereafter. The predecessor CTF was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions that might have adversely affected performance.

² Portfolio composition is as of 9/30/18 and is subject to change at any time. Bond ratings reflect the rating entity's evaluation of the issuer's ability to pay interest and repay principal on the bond on a timely basis. Bonds rated BBB/Baa or higher are considered investment grade, while bonds rated BB/Ba or lower are considered speculative as to the timely payment of interest and principal.

³ Duration is a measure of volatility expressed in years. The higher the number, the greater potential for volatility as interest rates change.

⁴ Credit ratings reflect only those assigned by S&P, Moody's, and/or Fitch. Split-rated bonds, if any, are reported in the higher rating category.

⁵ The "Investment Style Classification" graphically depicts the fund's investment strategy as described in its prospectus. The horizontal and vertical axes describe the fund's general credit quality and weighted average maturity, respectively. The graphic supports asset allocation decisions and does not depict actual fund holdings at a point in time.

⁶ Source: Morningstar. Reflects reinvestment of dividends and, where applicable, capital gain distributions. The Bloomberg Barclays U.S. Intermediate Government/Credit Bond Index is a widely accepted, unmanaged index of government and credit bond market performance composed of U.S. government, treasury and agency securities, fixed-income securities and nonconvertible investment-grade Credit debt, with an average maturity of 1-10 years. Investors cannot invest directly in any index.

⁷ Source: Morningstar. The ratings formula measures the amount of variation in a fund's performance and gives more emphasis to downward variations. The top 10% of the funds in the category receive five stars; the next 22.5% four stars; the next 35% three stars; the next 22.5% two stars; and the last 10% one star. Ratings reflect applicable sales loads.

Not FDIC-Insured. Not Bank-Guaranteed. May Lose Value.

BNY MELLON INTERMEDIATE BOND FUND – CLASS M

Goal/Approach

The fund seeks total return (consisting of capital appreciation and current income).

To pursue its goal, the fund actively manages bond market and maturity exposure and invests at least 80% of its net assets, plus any borrowings for investment purposes, in bonds, such as:

- * U.S. government and agency bonds
- * corporate bonds
- * mortgage-related securities, including commercial mortgage-backed securities (up to 25% of total assets)
- * foreign corporate and government bonds (up to 20% of total assets)
- * municipal bonds

The fund's investments in bonds must be of investment grade (i.e. Baa/BBB or higher) quality at the time of purchase or, if unrated, deemed of comparable quality by the investment adviser. Generally, the fund's average effective portfolio maturity will be between 3 and 10 years and its

average effective portfolio duration will be between 2.5 and 5.5 years. The fund may invest in individual bonds of any maturity or duration. In calculating average effective portfolio maturity and average effective portfolio duration, the fund may treat a bond that can be repurchased by its issuer on an earlier date (known as a "call date") as maturing on the call date rather than on its stated maturity date.

The investment adviser uses a disciplined process to select bonds and manage risk. The investment adviser chooses bonds based on yield, credit quality, the level of interest rates and inflation, general economic and financial trends, and its outlook for the securities markets.

Portfolio Management

The investment adviser for the fund is BNY Mellon Fund Advisers, a division of The Dreyfus Corporation.

John F. Flahive and Timothy J. Sanville are the fund's primary portfolio managers, a position they have held since March 2006

and September 2015 respectively. Mr. Flahive is a senior vice president of The Bank of New York Mellon, an affiliate of The Dreyfus Corporation. Mr. Sanville is a first vice president of The Bank of New York Mellon. Mr. Flahive and Mr. Sanville also are employees of The Dreyfus Corporation and manage the fund as employees of The Dreyfus Corporation.

Certain Risks

The fund is subject generally to interest rate, credit, liquidity, prepayment and extension risk (as to mortgage-related holdings), call, sector, and market risks, to varying degrees, all of which are more fully described in the fund's prospectus.

Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines.

Please refer to the prospectus for a more complete discussion of the fund's main risks.

Investors should consider the investment objectives, risks, charges, and expenses of the fund carefully before investing. Contact your financial advisor to obtain a prospectus, or a summary prospectus, if available, that contains this and other information about the fund, and read it carefully before investing.
