Growth of a \$10,000 Investment¹

A hypothetical \$10,000 investment in the fund's Class A shares on 5/28/87 would have been worth \$48,310 on 12/31/18.

This does not reflect the 4.50% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

¹Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2018 Morningstar, Inc. Other share classes may have achieved different results.

²Portfolio composition is as of 12/31/2018 and is subject to change at any time. ³Bond ratings reflect the rating entity's evaluation of the issuer's ability to pay interest and repay principal on the bond on a timely basis. Bonds rated BBB/Baa or higher are considered investment grade, while bonds rated BB/Ba or lower are considered speculative as to the timely payment of interest and principal. ⁴Credit ratings reflect only those assigned by S&P, Moody's, and/or Fitch. Split-rated securities, if any, are reported in the higher rating category.

Risks: Bonds are subject to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **Municipal income** may be subject to state and local taxes for out-of-state residents. Some income may be subject to the federal alternative minimum tax for certain investors. Capital gains, if any, are taxable.
