## Growth of a \$10,000 Investment<sup>1</sup>

A hypothetical \$10,000 investment in the fund's Class A shares on 7/15/93 would have been worth \$70,908 on 12/31/18.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

## Goal/Approach

The fund seeks long-term capital growth consistent with the preservation of capital; current income is a secondary goal. To pursue its goals, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in the common stock of U.S. and foreign companies. The fund focuses on "blue chip" multinational companies with total market values of more than \$5 billion. These are large, established, globally managed companies that manufacture and distribute their products and services throughout the world.

## Portfolio Management

The fund's investment adviser is The Dreyfus Corporation (Dreyfus) and the fund's sub-investment adviser is Faye Sarofim & Co. (Sarofim & Co.). \*Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2018 Morningstar, Inc. Other share classes may have achieved different results.

<sup>1</sup>Portfolio composition is as of 12/31/2018 and is subject to change at any time.

There is no guarantee that dividend-paying companies will continue to pay, or increase, their dividend.

**Risks:** Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. These risks generally are greater with emerging market countries. A concentration of companies in a narrow **sector** could cause performance to be more volatile than funds invested in a broader range of industries. **Small and mid-sized company stocks** tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories.
