The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Year-to-date performance is not annualized. Go to dreyfus.com for the fund’s most recent month-end returns. Total Expense Ratio: Class M 0.80%.

1Before the fund commenced operations on 10/2/00, substantially all of the assets of a predecessor common trust fund (CTF) that, in all material respects, had the same investment objective, policies, guidelines and restrictions as the fund were transferred to the fund. The performance figures presented represent the performance of the predecessor CTF through 10/1/00, adjusted to reflect the fund’s fees and expenses, by subtracting from the actual performance of the CTF the expenses of the fund’s class M shares (net of any fee waivers and expense reimbursements), and the performance of the fund’s Class M shares thereafter. The predecessor CTF was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions that might have adversely affected performance. In addition, the expenses of the fund’s Class M shares may be higher than those estimated prior to the conversion of the CTF, which would lower the performance shown.2Portfolio composition is as of 12/31/2018 and is subject to change at any time.2Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower.6Source: FactSet. The Dow Jones U.S. Select Dividend™ Index is defined as all dividend-paying companies in the Dow Jones U.S. Index, excluding REITs, that have a non-negative historical five-year dividend-per-share growth rate, a five-year average dividend coverage ratio of greater than or equal to 167%, paid dividends in each of the previous five years, non-negative trailing 12-month earnings-per-share (EPS), a float-adjusted market capitalization of at least US$1 billion, and three-month average daily trading volume of 200,000 shares. Investors cannot invest directly in any index.

Investors should consider the investment objectives, risks, charges, and expenses of the fund carefully before investing. Contact your financial advisor to obtain a prospectus and, if available, the summary prospectus that contains this and other information about the fund, and read it carefully before investing.

*Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2018 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The fund represents a single portfolio with multiple share classes that have different expense structures. Other share classes may have achieved different results. The Morningstar Extended Performance Rating is calculated by adjusting the performance of the fund's oldest share class to reflect the fee structure of the younger share class, and then compounding the adjusted plus actual monthly returns into the extended performance Risk-Adjusted Return for the 3-, 5- and 10-year time periods.

*Effectively as of 12/31/2019 and is subject to change at any time. There is no guarantee that dividend-paying companies will continue to pay, or increase, their dividend.

**Risks:** Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
