Growth of a $10,000 Investment
A hypothetical $10,000 investment in the fund's Class A shares on 7/15/93 would have been worth $81,207 on 3/31/19.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund’s other share classes would vary.

1Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. 2Portfolio composition is as of 03/31/2019 and is subject to change at any time. 3Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. 4Source: FactSet. Reflects reinvestment of net dividends and, where applicable, capital gain distributions. The MSCI World Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed markets. Investors cannot invest directly in any index.

The fund represents a single portfolio with multiple share classes that have different expense structures. Other share classes may have achieved different results. Ratings do not guarantee future results. The holdings listed should not be considered recommendations to buy or sell a security. Large concentrations can increase share price volatility.
