**BNY Mellon Mid Cap Multi-Strategy Fund**

**Class M MPMCX**

**Goal/Approach**
The fund seeks capital appreciation. The fund’s investment strategy provides exposure to various mid-cap equity portfolio managers, investment strategies and styles. The fund’s investment adviser has allocated the fund’s assets among multiple investment strategies employed by the fund’s investment adviser and unaffiliated sub-investment advisers known as Boston Partners Global Investors Inc. (Boston Partners), a wholly owned subsidiary of Robeco US Holding, Inc., and Henderson Geneva Capital Management LLC (Geneva). To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of mid-cap companies.

**CUSIP**
Class M 05569M509

**Assets for the Fund**
$2,774,916,944

**Holdings**

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor’s shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year are not annualized. Go to dreyfus.com for the fund’s most recent month-end returns. Total Expense Ratio: Class M 0.89%.

---

A significant portion of the fund’s recent performance is attributable to positive returns from its initial public offering (IPO) investments. There can be no guarantee that IPOs will have or continue to have a positive effect on the fund’s performance. Currently, the fund is relatively small in asset size. IPOs tend to have a reduced effect on performance as a fund’s asset base grows.

1Before the fund commenced operations on 10/2/00, substantially all of the assets of a predecessor common trust fund (CTF) that, in all material respects (except as discussed in “Past Performance” of the fund’s prospectus), had the same investment objective, policies, guidelines and restrictions as the fund were transferred to the fund. The performance figures presented represent the performance of the predecessor CTF through 10/1/00, adjusted to reflect the fund’s fees and expenses, by subtracting from the actual performance of the CTF the expenses of the fund’s class M shares (net of any fee waivers and expense reimbursements), and the performance of the fund’s Class M shares thereafter. The predecessor CTF was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions that might have adversely affected performance. In addition, the expenses of the fund’s Class M shares may be higher than those estimated prior to the conversion of the CTF, which would lower the performance shown. 2Portfolio composition is as of 03/31/2019 and is subject to change at any time. 3Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. Source: FactSet. The Russell Midcap® Index measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap® Index is a subset of the Russell 1000® Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap® Index represents approximately 31% of the total market capitalization of the Russell 1000 companies. The Russell Midcap® Index is constructed to provide a comprehensive and unbiased barometer for the mid-cap segment. The index is completely reconstructed annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap opportunity set. 4Source: FactSet. The Russell Midcap® Value Index measures the performance of the mid-cap value segment of the U.S. equity universe. It includes those Russell Midcap® Index companies that are considered more value-oriented relative to the overall market as defined by Russell’s leading style methodology. The Russell Midcap® Value Index is constructed to provide a comprehensive and unbiased barometer of the mid-cap value market. The index is completely reconstructed annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap value market. 5Source: FactSet. The Russell Midcap® Growth Index measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Midcap Index companies with higher growth earning potential as defined by Russell’s leading style methodology. The Russell Midcap® Growth Index is constructed to provide a comprehensive and unbiased barometer of the mid-cap growth market. The index is completely reconstructed annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap growth market. Investors cannot invest directly in any index.

Portfolio Management

The investment adviser for the fund is BNY Mellon Fund Advisers, a division of The Dreyfus Corporation. Caroline Lee Tsao has been the fund’s primary portfolio manager responsible for investment allocation since December 2015. She is a senior investment strategist for BNY Mellon Wealth Management and manages the fund as an employee of The Dreyfus Corporation. Ms. Lee Tsao has been employed by The Bank of New York Mellon since August 2013. She has also been employed by Dreyfus since December 2015.

Investors should consider the investment objectives, risks, charges, and expenses of the fund carefully before investing. Contact your financial advisor to obtain a prospectus and, if available, the summary prospectus that contains this and other information about the fund, and read it carefully before investing.

The Dreyfus Corporation, BNY Mellon Wealth Management, and MBSC Securities Corporation are affiliated with The Bank of New York Mellon Corporation.

1Portfolio composition is as of 03/31/2019 and is subject to change at any time.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Small and midsize company stocks tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories.
