BNY Mellon Appreciation Fund, Inc.

Investing in what are viewed as high quality, multinational companies

Investor Shares  DGAGX  Class I  DGIGX

Goal/Approach
The fund seeks long-term capital growth consistent with the preservation of capital. Its secondary goal is current income. To pursue these goals, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in common stock. The fund focuses on “blue-chip” companies with total market capitalizations of more than $5 billion at the time of purchase, including multinational companies.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor’s shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year are not annualized. Go to im.bnymellon.com for the fund’s most recent month-end returns. Total Expense Ratios: Investor Shares 0.90%, Class I 0.66%. Not all classes of shares may be available to all investors or through all broker/dealer platforms.

¹The total return performance figures for Class I shares of the fund represent the performance of the fund’s Investor shares, for periods prior to 8/31/16, the inception date for Class I shares, and the performance of Class I from that inception date. Performance reflects the applicable class’ distribution/servicing fees since the inception date. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 06/30/2019 and is subject to change at any time. ³Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁴Source: FactSet. The S&P 500® Index is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization. Investors cannot invest directly in any index.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
