Goal/Approach
The fund seeks capital appreciation.
To pursue this goal, the fund normally invests at least 80% of its net assets in the stocks of small-cap companies with market capitalizations within the range of companies in the Russell 2000 Index at the time of purchase. The fund’s stock investments may include common stocks, preferred stocks and convertible securities of both U.S. and foreign issuers. Stocks are selected for the fund’s portfolio based primarily on bottom-up fundamental analysis.

Growth of a $10,000 Investment
A hypothetical $10,000 investment in the fund's Investor Shares shares on 12/29/93 would have been worth $147,053 on 6/30/19.

Assumes reinvestment of dividends and capital gains. Performance for the fund’s other share classes would vary.

Historical Performance (CL.I @ NAV)
Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ¹Source: FactSet. The Russell 2000 Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000 is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set. Investors cannot invest directly in any index. Not FDIC-Insured. Not Bank-Guaranteed. May Lose Value.

Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. To obtain a prospectus, or a summary prospectus, if available, that contains this and other information about a fund, contact your financial advisor or visit im.bnymellon.com. Read the prospectus carefully before investing. Investors should discuss with their advisor the eligibility requirements for Class I shares, which are available only to certain eligible investors, and the historical results achieved by the fund’s respective share classes.

Portfolio composition is as of 06/30/2019 and is subject to change at any time.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Small and midsized company stocks tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories. A significant overweight or underweight of companies, industries, or market sectors could cause performance to be more or less sensitive to developments affecting those sectors.
