Growth of a $10,000 Investment
A hypothetical $10,000 investment in the fund's Class A shares on 6/28/96 would have been worth $45,467 on 6/30/19.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year are not annualized. Go to im.bnymellon.com for the fund's most recent month-end returns. Total Expense Ratios: Class A 1.98%, Class C 2.73%, Class I 1.72%. Not all classes of shares may be available to all investors or through all broker/dealer platforms.

1Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors.
2Portfolio composition is as of 06/30/2019 and is subject to change at any time.
3Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower.
4Redemption Fee on all shares redeemed within 60 days of purchase. This fee is retained by the fund. (Not charged on shares sold through Auto Withdrawal or Auto-Exchange, or on shares acquired through dividend reinvestment.) Please see the fund’s SAI for more details.
5Source: FactSet. Reflects reinvestment of net dividends and, where applicable, capital gain distributions. Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
