BNY Mellon Mid Cap Multi-Strategy Fund
Class M  MPMCX

Goal/Approach
The fund seeks capital appreciation. The fund’s investment strategy provides exposure to various mid-cap equity portfolio managers, investment strategies and styles. The fund’s investment adviser has allocated the fund’s assets among multiple investment strategies employed by the fund’s investment adviser and unaffiliated sub-investment advisers known as Boston Partners Global Investors Inc. (Boston Partners), a wholly owned subsidiary of Robeco US Holding, Inc., and Henderson Geneva Capital Management LLC (Geneva). To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities.

Before the fund commenced operations on 10/2/00 (fund inception date), substantially all of the assets of a predecessor common trust fund (CTF) that, in all material respects, had the same investment objective, policies, guidelines and restrictions as the fund were transferred to the fund. The performance figures presented represent the performance of the predecessor CTF from its inception date (1/1/85) through 10/1/00, adjusted to reflect the fund's fees and expenses, by subtracting from the actual performance of the CTF the expenses of the fund's class M shares (net of any fee waivers and expense reimbursements), and the performance of the fund's Class M shares thereafter. The predecessor CTF was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions that might have adversely affected performance. Portfolio composition is as of 06/30/2019 and is subject to change at any time. Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. " Represents the CTF Inception Date. Source: FactSet. The Russell Midcap® Index measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap® Index is a subset of the Russell 1000® Index. It includes approximately 800 of the smallest securities based on a combination of their market capitalization and current index membership. The Russell Midcap® Index represents approximately 31% of the total market capitalization of the Russell 1000 companies. The Russell Midcap® Index is constructed to provide a comprehensive and unbiased barometer for the mid-cap segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap opportunity set. " Source: FactSet. The Russell Midcap® Value Index measures the performance of the mid-cap value segment of the U.S. equity universe. Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Small and midsized company stocks tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories.
