Goal/Approach
The fund seeks capital appreciation. To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities. The fund invests, under normal circumstances, in approximately 25-30 companies that are considered by the investment adviser to be positioned for long-term earnings growth. The fund may hold growth or value stocks or a blend of both. The fund may invest in the stocks of companies of any size, although it focuses on large-cap companies (generally, those companies with market capitalizations of $5 billion or more at the time of purchase). The fund invests primarily in equity securities of U.S. issuers, but may invest up to 25% of its assets in the equity securities of foreign issuers, including those in emerging market countries.

**Risks:** Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
