Goal/Approach
The fund seeks long-term capital growth consistent with the preservation of capital. Current income is a secondary goal. To pursue these goals, the fund primarily invests in common stocks issued by U.S. companies. The fund may invest up to 20% of its assets in foreign securities. In choosing stocks, portfolio managers focus on large-capitalization companies with strong positions in their industries and a catalyst that can trigger a price increase.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
