Goal/Approach

The fund seeks to match the performance of the Standard & Poor’s 500 Composite Stock Price Index (the “Index”). To pursue this goal, the fund generally is fully invested in stocks included in the Index, and in futures whose performance is tied to the Index. The fund attempts to have a correlation between its performance and that of the Index of at least .95, before expenses. A correlation of 1.00 would mean that the fund and the Index were perfectly correlated.

*Source: Morningstar. The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2019 Morningstar, Inc.
