BNY Mellon International Core Equity Fund

Class A DIEAX  Class C DIECX  Class I DIERX  Class Y DIEYX

Goal/Approach
The fund seeks long-term growth of capital. To pursue this goal, the fund normally invests at least 80% of its assets in equity securities of companies located in the foreign countries represented in the Morgan Stanley Capital International Europe, Australasia and Far East (EAFE) Index and Canada. The fund's stock investments may include common stocks, preferred stocks and convertible securities. The fund intends to invest in a broad range of countries. The fund may invest up to 20% of its assets in securities of issuers located in emerging market countries, but no more than 5% of its assets may be invested in issuers located in any one emerging market country. The fund invests in stocks that appear to be undervalued (as measured by their price/earnings ratios) and that may have value and/or growth characteristics. The portfolio managers employ a bottom-up investment approach, which emphasizes individual stock selection.

Performance figures may reflect reinbursements or fee waivers, without which the performance would have been lower. Source: FactSet. The MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted, market capitalization-weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. Reflects reinvestment of net dividends and, where applicable, capital gain distributions. Investors cannot invest directly in any index.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
