BNY Mellon Large Cap Stock Fund

Class M MPLCX  Investor Shares MILCX

**Goal/Approach**
The fund seeks capital appreciation. The fund pursues its goal by normally investing 80% of its net assets, plus any borrowings for investment purposes, in stocks of large-capitalization companies with market capitalization of $5 billion or more at the time of purchase. The portfolio managers apply a systematic, quantitative investment approach designed to identify and exploit relative misvaluations primarily within large-cap stocks in the U.S. stock market. The fund also may invest in foreign stocks. The portfolio managers use a proprietary valuation model that identifies and ranks stocks (Composite Alpha Ranking or CAR) based on: long-term relative valuation, earnings sustainability and a set of behavioral factors.

**Growth of a $10,000 Investment**
A hypothetical $10,000 investment in the fund's Class M shares on 1/1/85 would have been worth $325,578 on 9/30/19.

Assumes reinvestment of dividends and capital gains.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor’s shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods of less than 1 year is not annualized. Go to im.bnymellon.com for the fund’s most recent month-end returns. Total Expense Ratios: Class M 0.82%, Investor Shares 1.07%. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

*Before the fund commenced operations on 10/2/00 (fund inception date), substantially all of the assets of a predecessor common trust fund (CTF) that, in all material respects, had the same investment objective, policies, guidelines and restrictions as the fund were transferred to the fund. The performance figures presented represent the performance of the predecessor CTF from its inception date (1/1/85) through 10/1/00, adjusted to reflect the fund’s fees and expenses, by subtracting from the actual performance of the CTF the expenses of the fund’s class M shares (net of any fee waivers and expense reimbursements), and the performance of the fund's Class M shares thereafter. The predecessor CTF was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions that might have adversely affected performance. In addition, the expenses of the fund's Class M shares may be higher than those estimated prior to the conversion of the CTF, which would lower the performance shown. Portfolio composition is as of 9/30/2019 and is subject to change at any time. Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. Represents the CTF Inception Source: FactSet. The S&P 500® Index is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization. Investors cannot invest directly in any index.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
