Goal/Approach
The fund seeks long-term capital growth consistent with the preservation of capital. Current income is a secondary goal. To pursue these goals, the fund invests at least 80% of its net assets in common stocks. The fund may invest up to 25% of its assets in foreign securities. The fund’s stock investments may include common stocks, preferred stocks and convertible securities.

Growth of a $10,000 Investment
A hypothetical $10,000 investment in the fund's Class A shares on 2/4/72 would have been worth $704,650 on 9/30/19.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund’s other share classes would vary.

Historical Performance (CL.I @ NAV)

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year is not annualized. Go to im.bnymellon.com for the fund’s most recent month-end returns. The net expense ratio(s) reflect a contractual expense reduction agreement through 6/30/2020.

Total Expense Ratios: Class A 1.12%, Class C 1.84%, Class I 0.85%, Class Z 0.88%, Class Y 0.78%. Net Expense Ratios: Class A 1.03%, Class C 1.78%, Class I 0.78%, Class Z 0.85%, Class Y 0.78%. Not all classes of shares may be available to all investors or through all broker/dealer platforms.

Class Z shares generally are not available for new accounts. Please see the fund’s prospectus for details.

The total return performance figures for Class A, Class I and Class Y shares of the fund represent the performance of the fund’s Class Z shares for periods prior to 9/30/08, 9/30/18 and 7/1/13, the inception dates for Class A, Class I and Class Y shares, respectively, and the performance of Class A, Class I and Y, respectively, from those inception dates. Performance reflects the applicable class’s sales load and distribution/servicing fees since the inception date. Had these fees and expenses been reflected for periods prior, performance would have been lower. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 9/30/2019 and is subject to change at any time.

¹Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ³Source: FactSet. The Russell 1000 Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher growth earning potential as defined by Russell’s leading style methodology. The Russell 1000 Growth Index is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics. Investors cannot invest directly in any index.

Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. To obtain a prospectus, or a summary prospectus, if available, that contains this and other information about a fund, contact your financial advisor or visit im.bnymellon.com. Read the prospectus carefully before investing. Investors should discuss with their advisor the eligibility requirements for Class I and Y shares, which are available only to certain eligible investors, and the historical results achieved by the fund’s respective share classes.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.
