Current Yields as of 3/31/20

- SEC 30-day yield  0.36%
- 7-day yield  0.01%
- 7-day yield restated  -0.27%

The performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. Go to dreyfus.com for the fund’s most recent month-end returns. Yield fluctuates. SEC 30-day yield is based upon dividends per share from net investment income during the past 30 days, divided by the period ended maximum offering price per share and annualized.

The net expense ratio reflects a contractual expense reduction agreement, without which, the returns would have been lower. The agreement may not be amended without the approval of the fund’s shareholders.

As a measure of current income, 7-day yield more closely reflects the fund’s current income-generating ability than the total return.

The yields quoted reflect the current absorption of certain fund expenses by BNY Mellon Investment Adviser, Inc., without which yields would be “restated” as shown above.

Portfolio composition is subject to change at any time.

Please see the prospectus for expenses as of the fund’s most recent fiscal year-end. Operating expenses may vary from month to month.

Any order in proper form placed with BNY Mellon Investment Adviser, Inc. by the fund’s trading deadline and for which federal funds are received by 6:00 PM ET will be effective on that date. Investors will earn the dividend declared on that day.

WAM is a measure of the average maturity of all of the underlying money market instruments in the fund, weighted to reflect the relative percentage ownership of each instrument, and taking into account applicable “maturity shortening” provisions provided by Rule 2a-7. Generally, for money market funds, WAM can be used primarily as a measure of relative sensitivity to interest rate changes.

WAL is the WAM of the money market fund calculated without reference to the “maturity shortening” provisions of Rule 2a-7 permitted for purposes of calculating WAM. Because WAL does not reflect the rule’s “maturity shortening” provisions, WAL will generally be higher than WAM.

Monthly yield history is the annualized distribution rate that is based upon dividends per share from net investment income paid during the period, divided by the period ended maximum offering price per share, adjusted for capital gains (IF ANY) distributed during the period, and annualized based upon the number of days in the distribution period.

General Treasury and Agency Money Market Fund – Dreyfus Class

Fund Goal
The fund seeks a high level of current income consistent with stability of principal.

Investment Approach
The fund normally invests at least 80% of its net assets in U.S. Treasury securities and repurchase agreements collateralized solely by U.S. Treasury securities or securities issued by U.S. government agencies that are backed by the full faith and credit of the U.S. government (i.e., under normal circumstances, the fund will not invest more than 20% of its net assets in cash or repurchase agreements collateralized by cash), and typically invests exclusively in such securities.
