The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor’s shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year is not annualized. Go to im.bny Mellon.com for the fund’s most recent month-end returns. Total Expense Ratios: Investor Shares 0.90%, Class I 0.86%, Class Y 0.39%. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

1The total return performance figures for Class I and Y shares of the fund represent the performance of the fund’s Investor Shares for periods prior to 8/31/16 and 7/1/13, the inception dates for Class I and Y shares, respectively, and the performance of Class I and Y, respectively, from those inception dates. Performance reflects the applicable class’ distribution/servicing fees since the inception date. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors.

2Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. Source: FactSet. The S&P 500® Index is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization. Investors cannot invest directly in any index.

Goals/Approach

The fund seeks long-term capital growth consistent with the preservation of capital. Its secondary goal is current income. To pursue these goals, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in common stock. The fund focuses on "blue-chip" companies with total market capitalizations of more than $5 billion at the time of purchase, including multinational companies.

*Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2020 Morningstar, Inc. The fund represents a single portfolio with multiple share classes that have different expense structures. Other share classes may have achieved different results. Ratings do not reduce investment risk and are subject to change.

Portfolio composition is as of 3/31/2020 and is subject to change at any time.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund manages its investments in certain countries, companies, industries or market sectors, such positions will increase the fund’s exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.
