The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year is not annualized. Go to im.bnymellon.com for the fund's most recent month-end returns. The net expense ratio reflects a contractual expense reduction agreement, without which, the returns would have been lower. The agreement may not be amended without the approval of the fund's shareholders. Total Expense Ratio: Class I 0.21%. Net Expense Ratio: Class I 0.20%. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

¹Portfolio composition is as of 3/31/2020 and is subject to change at any time. Asset Exposure percentages include any exposure through long futures positions but do not include any short positions or currency transactions. ²Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ³Source: FactSet. Goal/Approach

The fund seeks to match the total return of the Standard & Poor's 500 Composite Stock Price Index (the "Index”). To pursue its goal, the fund normally invests at least 95% of its assets in common stocks included in the Index. The fund attempts to have a correlation between its performance and that of the S&P 500 Index of at least .95, before expenses. A correlation of 1.00 would mean that the fund and the S&P 500 Index were perfectly correlated.

Ms. Wong is a managing director and head of index portfolio management at Mellon. Mr. Brown is a managing director and co-head of equity index portfolio management at Mellon. Mr. Durante, Ms. Wong and Mr. Brown also are employees of BNYM Investment Adviser.

Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. To obtain a prospectus, or a summary prospectus, if available, that contains this and other information about a fund, contact your financial advisor or visit im.bnymellon.com. Read the prospectus carefully before investing. Investors should discuss with their advisor the eligibility requirements for Class I shares, which are available only to certain eligible investors, and the historical results achieved by the fund's respective share classes.

*Source: Morningstar. The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2020 Morningstar, Inc. The fund represents a single portfolio with multiple share classes that have different expense structures. Other share classes may have achieved different results. Ratings do not reduce investment risk and are subject to change.

*Portfolio composition is as of 3/31/2020 and is subject to change at any time. Asset Exposure percentages include any exposure through long futures positions but do not include any short positions or currency transactions.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. The fund uses an indexing strategy. It does not attempt to manage market volatility, use defensive strategies or reduce the effects of any long-term periods of poor stock performance. Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund’s exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.
