The Fund is subject to investment risk, including the possible loss of the entire amount you invest. Managed assets means the total assets of the fund, including any assets attributable to leverage, minus the fund's accrued liabilities, other than any liabilities or obligations attributable to leverage.

1The average effective maturity does not take into account the fund's use of leverage.

2Duration is used to measure the market price sensitivity of the fund's portfolio holdings to market interest-rate changes; duration is expected to change over time with changes in market factors and the time to maturity of the fund's portfolio holdings. Effective duration incorporates certain characteristics of the fund's portfolio holdings, such as yield, coupon payments, price and par value, final maturity (if any) and any call features. Generally, rising interest rates may lengthen the duration of the fund as portfolio holdings with call features may become less likely to be exercised as interest rates rise, making them more sensitive to changes in interest rates. Conversely, decreasing interest rates generally may shorten the fund's duration if any call features of portfolio holdings are more likely to be exercised as a result of such interest-rate decrease, thereby making the fund less sensitive to changes in interest rates. Unlike unleveraged effective duration, leveraged effective duration takes into account the impact of the fund's use of leverage on the potential effect of interest-rate changes on the fund's portfolio and optional call provisions of the fund's portfolio holdings. The fund is not subject to any formal restrictions on its average leverage.

3In addition to Percent Leveraged outstanding (which is financial leverage), the fund participates in inverse floater structures (also referred to as Tender Option Bond programs) which are considered debt instruments. The use of leverage can magnify the fund’s gains and losses.

4Credit ratings reflect only those assigned by S&P, Moody's, and/or Fitch. Split-rated securities if any, are reported in the higher rating category.

Past performance is no guarantee of future performance, and price, yield and dividend rate will vary. The use of leverage can magnify the fund’s gains and losses. If you have questions, contact us at 1-800-334-6899.

This information is for BNY Mellon Municipal Bond Infrastructure Fund, Inc. (Ticker: DMB), covers the period from inception 4/26/13 through 7/31/2019 (except as otherwise noted), and is subject to change at any time. All information is based on the market value of the portfolio (except as otherwise noted) and includes those assets purchased through the use of leverage. This information is provided for informational purposes only and does not constitute a solicitation of an offer to buy or an offer to sell shares of the fund, securities or related financial instruments. As a closed-end fund, the shares of common stock of BNY Mellon Municipal Bond Infrastructure Fund, Inc. are listed on the NYSE and can only be bought and sold in the secondary market.

Closed-end fund shares may frequently trade at a discount or premium to their net asset value. Additional information regarding the Fund can be found in the Fund's most recent shareholder report. BNY Mellon Investment Adviser, Inc., a wholly-owned subsidiary of The Bank of New York Mellon Corporation ("BNY Mellon"), serves as the fund’s investment adviser. Mellon Investments Corporation, an affiliate of BNY Mellon, serves as the fund's sub-investment adviser.
