The holdings listed should not be considered recommendations to buy or sell a security. Large concentrations can increase share price volatility.

Goal/Approach

The fund seeks total return (consisting of capital appreciation and income). To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities. The fund focuses on dividend-paying stocks of foreign companies, including those in emerging market countries. The fund normally invests substantially all of its assets in the equity securities of issuers located outside the United States and diversifies broadly among developed and emerging market countries. The fund may invest in the stocks of companies of any market capitalization.

Portfolio Management

The fund's investment adviser is BNY Mellon Fund Advisers, Inc., a division of BNY Mellon Investment Adviser, Inc., Peter D. Goslin, CFA, Syed A. Zamil, CFA and Tao Wang are the fund's primary portfolio managers. Messrs. Goslin, Zamil and Wang have been primary portfolio managers of the fund since July 2015, March 2017 and December 2019, respectively. Mr. Goslin is a director and senior portfolio manager at Mellon, an affiliate of BNYM Investment Adviser, where he leads the Multi-Factor Equity Team. Mr. Zamil is a managing director and global investment strategist for the Multi-Factor Equity team at Mellon. Mr. Wang is a director and senior quantitative researcher providing core research to domestic, global and emerging markets quantitative equity models, as well as designing, enhancing and maintaining the production models for Mellon's quantitative equity portfolios. Messrs. Goslin, Zamil and Wang also are employees of BNYM Investment Adviser and manage the fund in their capacity as employees of BNYM Investment Adviser.

Investors should consider the investment objectives, risks, charges, and expenses of the fund carefully before investing. Contact your financial advisor to obtain a prospectus and, if available, the summary prospectus that contains this and other information about the fund, and read it carefully before investing.

*Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. ©2020 Morningstar, Inc. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The fund represents a single portfolio with multiple share classes that have different expense structures. Other share classes may have achieved different results. Ratings do not reduce investment risk and are subject to change.

†Portfolio composition is as of 3/31/2020 and is subject to change at any time.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.
