1 As a measure of current income, 7-day yield more closely reflects the fund’s current income-generating ability than the total return.
2 The yields quoted reflect the current absorption of certain fund expenses by BNY Mellon Investment Adviser, Inc., without which yields would be “restated” as shown above.
3 Portfolio composition is subject to change at any time.
4 Please see the prospectus for expenses as of the fund’s most recent fiscal year-end. Operating expenses may vary from month to month.
5 Any order in proper form placed with BNY Mellon Investment Adviser, Inc. by the fund’s trading deadline and for which federal funds are received by 6:00 PM ET will be effective on that date. Investors will earn the dividend declared on that day.
6 Data reflects days until final maturity for individual portfolio securities.
7 WAM is a measure of the average maturity of all of the underlying money market instruments in the fund, weighted to reflect the relative percentage ownership of each instrument, and taking into account applicable “maturity shortening” provisions provided by Rule 2a-7. Generally, for money market funds, WAM can be used primarily as a measure of relative sensitivity to interest rate changes.
8 WAL is the WAM of the money market fund calculated without reference to the “maturity shortening” provisions of Rule 2a-7 permitted for purposes of calculating WAM. Because WAL does not reflect the rule’s “maturity shortening” provisions, WAL will generally be higher than WAM.
9 Monthly yield history is the annualized distribution rate that is based upon dividends per share from net investment income paid during the period, divided by the period ended maximum offering price per share, adjusted for capital gains (IF ANY) distributed during the period, and annualized based upon the number of days in the distribution period.

Fund Goal
The fund seeks as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity.

Investment Approach
The fund normally invests at least 80% of its net assets in U.S. Treasury securities and repurchase agreements collateralized solely by U.S. Treasury securities.

Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.

* Fund ratings are statements of opinion, not statements of fact or recommendations to buy, sell or hold the shares of a fund and are subject to change. The portfolio's credit quality does not remove market risks. All funds are formally assessed on an annual basis with each of the Dreyfus money market fund ratings affirmed in 2019. However, the funds are subject to ongoing surveillance and the rating agencies may revise the fund rating or outlook at any time. Standard & Poor's (S&P) believes that, with a Principal Stability Rating of AAAm, the fund has an extremely strong capacity to maintain principal and stability and to limit exposure to principal losses due to credit, market, and/or liquidity risks. For more information on rating methodology, visit www.standardandpoors.com. Moody's Investors Service rates money market mutual funds 'Aaa-mf' if, in Moody's opinion, a fund has a very strong ability to meet the dual objectives of providing liquidity and preserving capital. This rating, which is derived from a combination of Moody's assessment of a fund's Portfolio Credit Profile, Portfolio Stability Profile, and other qualitative factors, is not intended to consider prospective performance of a fund. For more information on rating methodology, visit www.moodys.com. Fitch's International Money Market Fund Rating of AAAmf denotes Fitch's opinion that the fund has an extremely strong capacity to achieve its investment management objective of preserving principal and providing shareholder liquidity through limiting credit, market, and liquidity risk. Fitch's rating does not opine on any quality other than the fund’s ability to maintain a stable net asset value. For more information on rating methodology, visit www.fitchratings.com. Rating agencies may revise or withdraw their ratings at any time, and ratings are not intended to guarantee a fund's performance, nor are they intended to signal the suitability of an investment.
