## Growth of a \$10,000 Investment<sup>1</sup>

A hypothetical \$10,000 investment in the fund's Class A shares on 1/1/88 would have been worth \$391,521 on 9/30/18.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. For funds with less than 1 year's history, year-to-date and 3-month performance are not annualized. Go to [dreyfus.com](http://dreyfus.com) for the fund's most recent month-end returns. Total Expense Ratios: Class A 1.04%, Class C 1.79%, Class I 0.75%, Class Z 0.86%.

Class Z shares are closed to new investment accounts. <sup>1</sup>On 3/31/09 existing shares were designated Class I shares and the fund began to offer Class A and C shares. The total return performance figures for Class A and C shares presented for periods prior to 3/31/09 reflect the performance of the fund's Class I shares, adjusted to reflect the applicable sales load for that class. Performance has not been adjusted to reflect any class-specific distribution or servicing fees or any differences in operating expenses but these fees and expenses are reflected in returns for periods after 3/31/09. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. <sup>2</sup>The total return performance figures presented for Class Z shares of the fund represent the performance of the fund's Class I for periods prior to 1/19/18, the inception date for Class Z shares, and the performance of Class Z, respectively, from that inception date. Performance reflects the applicable class' distribution/servicing fees since the inception date. Had these fees and expenses been reflected for periods prior, performance would have been different. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, anticipated holding period and other relevant factors. <sup>3</sup>Portfolio composition is as of 9/30/18 and is subject to change at any time. <sup>4</sup>Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. <sup>5</sup>Source: FactSet. The Russell 2500 Growth Index measures the performance of the small- to mid-cap growth segment of the U.S. equity universe. It includes those Russell 2500 companies with higher growth earning potential as defined by Russell's leading style methodology. The Russell 2500 Growth Index is constructed to provide a comprehensive and unbiased barometer of the small- to mid-cap growth market. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small- to mid-cap opportunity set and that the represented companies continue to reflect growth characteristics. Investors cannot invest directly in any index.

\*Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2018 Morningstar, Inc.
