A LETTER FROM THE PRESIDENT OF DREYFUS

Dear Shareholder:

We are pleased to present this semiannual report for General New Jersey Municipal Money Market Fund, Inc., covering the six-month period from December 1, 2017 through May 31, 2018. For information about how the fund performed during the reporting period, as well as general market perspectives, we provide a Discussion of Fund Performance on the pages that follow.

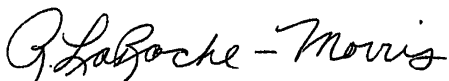

After a period of unusually mild price swings in 2017, inflation concerns, geopolitical tensions and potential trade disputes have caused volatility to increase substantially during 2018. As a result, U.S. stocks generally have produced mildly positive returns while bonds have lost a degree of value over the first five months of the year.

Stocks set a series of new record highs through January 2018 before market volatility took its toll, enabling stocks across all capitalization ranges to produce solidly positive returns for the full six-month reporting period. Stocks gained value amid growing corporate earnings, improving global economic conditions and the enactment of tax reform legislation and other government policy reforms. In contrast, most sectors of the U.S. bond market produced roughly flat total returns or lost a degree of value when short-term interest rates climbed and inflation expectations increased.

Despite the return of heightened market volatility, we believe that underlying market fundamentals remain strong. Continued economic growth, a robust labor market, rising corporate earnings and strong consumer and business confidence seem likely to support stock and corporate bond prices over the months ahead. As always, we encourage you to discuss the risks and opportunities of today's investment environment with your financial advisor.

Thank you for your continued confidence and support.

Sincerely,

Renee Laroche-Morris
President
The Dreyfus Corporation
June 15, 2018

DISCUSSION OF FUND PERFORMANCE (Unaudited)

For the period from December 1, 2017 through May 31, 2018, as provided by Joseph Irace, Senior Portfolio Manager

Market and Fund Performance Overview

For the six-month period ended May 31, 2018, General New Jersey Municipal Money Market Fund, Inc's Class A shares produced an annualized yield of 0.60%. Taking into consideration the effects of compounding, the fund's Class A shares produced an annualized effective yield of 0.60%.¹

Yields of municipal money market instruments climbed during the reporting period in response to two interest-rate hikes by the Federal Reserve Board (the "Fed") and changing supply-and-demand dynamics in the municipal securities market.

The Fund's Investment Approach

The fund seeks as high a level of current income exempt from federal and New Jersey state income taxes as is consistent with the preservation of capital and the maintenance of liquidity. To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in short-term, high-quality municipal obligations that provide income exempt from federal and New Jersey state income taxes. The fund also may invest in high-quality, short-term structured notes, which are derivative instruments whose value is tied to underlying municipal obligations.

Although the fund seeks to provide income exempt from federal and New Jersey state income taxes, income from some of the fund's holdings may be subject to the federal alternative minimum tax. The fund also may invest temporarily in high-quality, taxable money market instruments, including when the portfolio manager believes acceptable New Jersey state municipal obligations are not available for investment. During such periods, the fund may not achieve its investment objective. In addition, a portion of the fund's assets may be invested in short-term, high-quality municipal obligations that do not pay income that is exempt from New Jersey state income taxes. The fund is non-diversified.

Rising Rates and Technical Factors Drove Yields Higher

Sustained economic growth and a series of short-term interest-rate hikes by the Fed had driven yields of tax-exempt money market instruments higher in the months before the start of the reporting period. The Fed again raised the overnight federal funds rate in December 2017 and March 2018, causing yields to rise on shorter-maturity instruments, most notably variable-rate demand notes ("VRDNs").

In addition, issuers of longer-term municipal bonds rushed to market in December with a flood of new securities in anticipation of tax reform legislation that seemed likely at the time to inhibit certain traditional financing vehicles used by states and municipalities. This increase in supply put upward pressure on yields when investors sold short-term securities to raise funds for the purchase of longer-dated bonds.

The surge in new issuance at year-end 2017 resulted in a relative scarcity of newly issued municipal instruments in early 2018. The lack of new supply, combined with investors' need to reinvest coupon payments, pushed yields lower through mid-February. Yields also were

DISCUSSION OF FUND PERFORMANCE (*Unaudited*) (*continued*)

dampened by federal tax reform legislation, which increased demand from investors who faced new limits on the amount of state and local tax deductions they can take on their federal tax returns. Municipal money market yields subsequently drifted higher amid reports of wage growth and other inflationary pressures. Yields moderated in May, in part due to economic concerns stemming from more protectionist U.S. trade policies.

States with underfunded pension programs also have faced greater credit pressures. New Jersey faces these challenges, and the state's residents also may experience declining home values under the new tax law due to the limited deductibility of property taxes.

Maintaining a Prudent Investment Posture

In the generally rising interest-rate environment, most municipal money market funds maintained short weighted average maturities with a focus on liquidity. We set the fund's weighted average maturities in a range that is somewhat shorter than industry averages.

We also have maintained a careful and well-researched credit selection strategy. We have continued to identify what we believe to be low-credit-risk opportunities among essential service revenue bonds issued by water, sewer, and electric enterprises; select local credits with strong financial positions and stable tax bases; and various health-care and education issuers.

Additional Rate Hikes Expected

Just days after the reporting period's end, the Fed raised the overnight federal funds rate to between 1.75% and 2.00% while continuing to unwind its balance sheet through the sale of U.S. government securities. More short-term interest-rate hikes are anticipated over the remainder of 2018 and into 2019.

Therefore, we intend to continue to emphasize liquidity in order to capture higher yields as short-term rates rise. In addition, we believe that a focus on preservation of capital and liquidity remains the prudent course for the fund's management.

June 15, 2018

¹ *Annualized effective yield is based upon dividends declared daily and reinvested monthly. Past performance is no guarantee of future results. Yields fluctuate. Income may be subject to state and local taxes for non-New Jersey residents, and some income may be subject to the federal alternative minimum tax (AMT) for certain investors.*

You could lose money by investing in a money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. The fund may impose a fee upon the sale of your shares or may temporarily suspend your ability to sell shares if the fund's liquidity falls below required minimums because of market conditions or other factors. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Short-term municipal securities holdings involve credit and liquidity risks and risk of principal loss.

UNDERSTANDING YOUR FUND'S EXPENSES (Unaudited)

As a mutual fund investor, you pay ongoing expenses, such as management fees and other expenses. Using the information below, you can estimate how these expenses affect your investment and compare them with the expenses of other funds. You also may pay one-time transaction expenses, including sales charges (loads) and redemption fees, which are not shown in this section and would have resulted in higher total expenses. For more information, see your fund's prospectus or talk to your financial adviser.

Review your fund's expenses

The table below shows the expenses you would have paid on a \$1,000 investment in General New Jersey Municipal Money Market Fund, Inc. from December 1, 2017 to May 31, 2018. It also shows how much a \$1,000 investment would be worth at the close of the period, assuming actual returns and expenses.

Expenses and Value of a \$1,000 Investment

assuming actual returns for the six months ended May 31, 2018

Expenses paid per \$1,000 [†]	\$	3.85
Ending value (after expenses)	\$	1,003.00

COMPARING YOUR FUND'S EXPENSES WITH THOSE OF OTHER FUNDS (Unaudited)

Using the SEC's method to compare expenses

The Securities and Exchange Commission ("SEC") has established guidelines to help investors assess fund expenses. Per these guidelines, the table below shows your fund's expenses based on a \$1,000 investment, assuming a hypothetical 5% annualized return. You can use this information to compare the ongoing expenses (but not transaction expenses or total cost) of investing in the fund with those of other funds. All mutual fund shareholder reports will provide this information to help you make this comparison. Please note that you cannot use this information to estimate your actual ending account balance and expenses paid during the period.

Expenses and Value of a \$1,000 Investment

assuming a hypothetical 5% annualized return for the six months ended May 31, 2018

Expenses paid per \$1,000 [†]	\$	3.88
Ending value (after expenses)	\$	1,021.09

[†] Expenses are equal to the fund's annualized expense ratio of .77%, multiplied by the average account value over the period, multiplied by 182/365 (to reflect the one-half year period).

FINANCIAL HIGHLIGHTS

The following table describes the performance for the fiscal periods indicated. Total return shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distributions. These figures have been derived from the fund's financial statements.

Class A Shares	Six Months Ended	Year Ended November 30,				
	May 31, 2018 (Unaudited)	2017	2016	2015	2014	2013
Per Share Data (\$):						
Net asset value, beginning of period	1.00	1.00	1.00	1.00	1.00	1.00
Investment Operations:

NOTES TO FINANCIAL STATEMENTS (Unaudited)

NOTE 1—Significant Accounting Policies:

General New Jersey Municipal Money Market Fund, Inc. (the “fund”) is registered under the Investment Company Act of 1940, as amended (the “Act”), as a non-diversified open-end management investment company. The fund’s investment objective is to seek as high a level of current income exempt from federal and New Jersey state income taxes as is consistent with the preservation of capital and the maintenance of liquidity. The Dreyfus Corporation (the “Manager” or “Dreyfus”), a wholly-owned subsidiary of The Bank of New York Mellon Corporation (“BNY Mellon”), serves as the fund’s investment adviser. MBSC Securities Corporation (the “Distributor”), a wholly-owned subsidiary of Dreyfus, is the distributor of the fund’s shares, which are sold to the public without a sales charge.

Class A shares are designed primarily for people who are investing through a third party financial intermediary, such as a bank, broker-dealer, financial adviser or retirement plan. Class A shares bear a Shareholder Services Plan fee.

The fund operates as a “retail money market fund” as that term is defined in Rule 2a-7 under the Act (a “Retail Fund”). It is the fund’s policy to maintain a constant net asset value (“NAV”) per share of \$1.00, and the fund has adopted certain investment, portfolio valuation and dividend and distribution policies to enable it to do so. There is no assurance, however, that the fund will be able to maintain a constant NAV per share of \$1.00. As a Retail Fund, the fund may, or in certain circumstances, must impose a fee upon the sale of shares or may temporarily suspend redemptions if the fund’s weekly liquid assets fall below required minimums because of market conditions or other factors.

The Financial Accounting Standards Board (“FASB”) Accounting Standards Codification is the exclusive reference of authoritative U.S. generally accepted accounting principles (“GAAP”) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (“SEC”) under authority of federal laws are also sources of authoritative GAAP for SEC registrants. The fund’s financial statements are prepared in accordance with GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

The fund enters into contracts that contain a variety of indemnifications. The fund’s maximum exposure under these arrangements is unknown. The fund does not anticipate recognizing any loss related to these arrangements.

(a) Portfolio valuation: Investments in securities are valued at amortized cost in accordance with Rule 2a-7 under the Act. If amortized cost is determined not to approximate market value, the fair value of the portfolio securities will be determined by procedures established by and under the general supervision of the fund’s Board of Directors (the “Board”).

The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. This hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

Additionally, GAAP provides guidance on determining whether the volume and activity in a market has decreased significantly and whether such a decrease in activity results in transactions that are not orderly. GAAP requires enhanced disclosures around valuation inputs and techniques used during annual and interim periods.

Various inputs are used in determining the value of the fund’s investments relating to fair value measurements. These inputs are summarized in the three broad levels listed below:

Level 1—unadjusted quoted prices in active markets for identical investments.

Level 2—other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3—significant unobservable inputs (including the fund’s own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For example, money market securities are valued using amortized cost, in accordance with rules under the Act. Generally, amortized cost approximates the current fair value of a security, but since the value is not obtained from a quoted price in an active market, such securities are reflected within Level 2 of the fair value hierarchy.

The following is a summary of the inputs used as of May 31, 2018 in valuing the fund’s investments:

Valuation Inputs	Short-Term Investments (\$) [†]
Level 1 - Unadjusted Quoted Prices	-
Level 2 - Other Significant Observable Inputs	98,131,573
Level 3 - Significant Unobservable Inputs	-
Total	98,131,573

[†] See Statement of Investments for additional detailed categorizations.

At May 31, 2018, there were no transfers between levels of the fair value hierarchy. It is the fund's policy to recognize transfers between levels at the end of the reporting period.

(b) Securities transactions and investment income: Securities transactions are recorded on a trade date basis. Interest income, adjusted for accretion of discount and amortization of premium on investments, is earned from settlement date and is recognized on the accrual basis. Realized gains and losses from securities transactions are recorded on the identified cost basis.

The fund follows an investment policy of investing primarily in municipal obligations of one state. Economic changes affecting the state and certain of its public bodies and municipalities may affect the ability of issuers within the state to pay interest on, or repay principal of, municipal obligations held by the fund.

(c) Dividends and distributions to shareholders: It is the policy of the fund to declare dividends daily from investment income-net. Such dividends are paid monthly. Dividends from net realized capital gains, if any, are normally declared and paid annually, but the fund may make distributions on a more frequent basis to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the "Code"). To the extent that net realized capital gains can be offset by capital loss carryovers, it is the policy of the fund not to distribute such gains.

(d) Federal income taxes: It is the policy of the fund to continue to qualify as a regulated investment company, which can distribute tax-exempt dividends, by complying with the applicable provisions of the Code, and to make distributions of income and net realized capital gain sufficient to relieve it from substantially all federal income and excise taxes.

As of and during the period ended May 31, 2018, the fund did not have any liabilities for any uncertain tax positions. The fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of Operations. During the period ended May 31, 2018, the fund did not incur any interest or penalties.

Each tax year in the three-year period ended November 30, 2017 remains subject to examination by the Internal Revenue Service and state taxing authorities.

The tax character of distributions paid to shareholders during the fiscal year ended November 30, 2017 was as follows: tax exempt income \$95,805 and long-term capital gains \$51,476. The tax character of current year distributions will be determined at the end of the current fiscal year.

At May 31, 2018, the cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes (see the Statement of Investments).

NOTE 2—Management Fee and Other Transactions with Affiliates:

(a) Pursuant to a management agreement with Dreyfus, the management fee is computed at the annual rate of .50% of the value of the fund's average daily net assets and is payable monthly.

(b) Under the Shareholder Services Plan, the fund reimburses the Distributor at an amount not to exceed an annual rate of .25% of the value of the fund's average daily net assets for the provision of certain services. The services provided may include personal services relating to shareholder accounts, such as answering shareholder inquiries regarding the fund and providing reports and other information, and services related to the maintenance of shareholder accounts. During the period ended May 31, 2018, the fund was charged \$32,141 pursuant to the Shareholder Services Plan.

The fund has arrangements with the transfer agent and the custodian whereby the fund may receive earnings credits when positive cash balances are maintained, which are used to offset transfer agency and custody fees. For financial reporting purposes, the fund includes net earnings credits as an expense offset in the Statement of Operations.

The fund compensates Dreyfus Transfer, Inc., a wholly-owned subsidiary of Dreyfus, under a transfer agency agreement for providing transfer agency and cash management services for the fund. The majority of transfer agency fees are comprised of amounts paid on a per account basis, while cash management fees are related to fund subscriptions and redemptions. During the period ended May 31, 2018, the fund was charged \$19,297 for transfer agency services and \$889 for cash management services. These fees are included in Shareholder servicing costs in the Statement of Operations. Cash management fees were offset by earnings credits of \$889.

The fund compensates The Bank of New York Mellon, a subsidiary of BNY Mellon and an affiliate of Dreyfus, under a custody agreement for providing custodial services for the fund. These fees are determined based on net assets, geographic region and transaction activity. During the period ended May 31, 2018, the fund was charged \$4,386 pursuant to the custody agreement. These fees were partially offset by earnings credits of \$264.

The fund compensates The Bank of New York Mellon under a shareholder redemption draft processing agreement for providing certain services related to the fund's check writing privilege. During the period ended May 31, 2018, the fund was charged \$626 pursuant to the agreement, which is included in Shareholder servicing costs in the Statement of Operations.

During the period ended May 31, 2018, the fund was charged \$6,320 for services performed by the Chief Compliance Officer and his staff. These fees are included in Miscellaneous in the Statement of Operations.

The components of "Due to The Dreyfus Corporation and affiliates" in the Statement of Assets and Liabilities consist of: management fees \$40,658, custodian fees \$3,466, Chief Compliance Officer fees \$5,267 and transfer agency fees \$6,721.

(c) Each Board member also serves as a Board member of other funds within the Dreyfus complex. Annual retainer fees and attendance fees are allocated to each fund based on net assets.

NOTE 3—Securities Transactions:

The fund is permitted to purchase or sell securities from or to certain affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the fund from or to another fund or portfolio that are, or could be, considered an affiliate by virtue of having a common investment adviser (or affiliated investment adviser), common Directors and/or common officers, complies with Rule 17a-7 under the Act. During the period ended May 31, 2018, the fund engaged in purchases and sales of securities pursuant to Rule 17a-7 under the Act amounting to \$16,540,000 and \$19,530,000, respectively.
