AERIAL VIEW
ACCESS A BROADER MARKET PERSPECTIVE

SHAKEN, NOT STIRRED

BY LYNN STRONGIN DODDS
the European money market fund universe this spring have barely dented investor appetite for the EUR1.3 trillion industry, and in fact could increase its size as firms look to diversify away from bank deposits, some industry experts say.

The regulations—which were delayed until March, two months after the original Jan. 21, 2019 deadline—are aimed at improving transparency, disclosure and liquidity in the funds following deficiencies seen in the 2008 financial meltdown.

Investors took the new rules in stride, in all fund types and in every currency, in part because the changes were well flagged and fund managers were able to prepare by shortening their exposures and raising additional liquidity in anticipation of any potential capital flight.

In the end, cash transitioned in an orderly fashion, primarily out of short-term money funds with stable values into new low volatility vehicles. “On the date of changeover it was just like a normal business day,” said Michelle Price, associate policy and technical director for the Association of Corporate Treasurers in London.

The re-categorization and launches of new funds make it difficult to track what money went where, but it is clear that assets in euro and U.S. dollar-denominated European money market funds have fallen year-to-date in 2019, according to Crane Data. Still, investors on the side lines are expected to tiptoe back in.

It is early days and the European rules will take time to bed down, but institutions with large liquidity balances are already back to scouting for fruitful places to park their cash. Money market funds could see an increase in their assets if benchmark deposit rates set by the region’s central bank continue to stay negative. Cash is expected to come trickling back in, just as it left money funds and returned when interest rates in Europe first went negative in 2014.

Bank deposits have traditionally been the preferred investment option for corporate treasurers in the UK and Europe, according to the ACT, but money market funds continue to be attractive.

For one thing, interest rates on deposits tend to lag increases in benchmark rates because they are set by bank committees, unlike money rates that immediately reflect increases in marketplace rates. Another reason is that some banks do not want to attract heavy cash deposits when they are costly to hold under post-crisis liquidity ratio regulations.

Even customers who continue to wait it out by investing in bank deposits or directly in cash-like securities may come back to money funds, because of their stability and attractive yields, some experts say. They offer a diversification of counterparties; a wide-ranging pool of underlying investments; and, in the case of almost all short-term European funds, triple-A ratings.

Given the low interest-rate environment in Europe, there are few places where corporates can park their cash safely. “We’re not seeing cash leaving money market funds into bank deposits,” said Robert O’Riordan, institutional business development director at BNY Mellon’s Insight Investment, a
specialist asset manager. Clients with large cash balances are increasingly looking to diversify away from single counterparty exposure to a few relationship banks,” he adds.

**MULTIPLE CHOICE**

Post-reform, investors have a new mix of choices for their money fund investments, including a new one called a short-term low volatility net asset value fund, whose price should remain stable under normal conditions but can fluctuate within a 20 basis point collar before investors experience a change in value on their shares. If that collar is breached, the fund’s price must be expressed in four decimal places instead of two.

The low-volatility net asset value (LVNAV) funds generally replaced another category called short-term “prime” constant net asset value (CNAV) funds, for investing in corporate and government debt. Meanwhile, short-term Treasury CNAV funds are now categorized as “Public Debt” constant net asset value (CNAV) funds and they must invest the vast majority of their holdings in government debt.

A third option, available before and after reform, is variable net asset value (VNAV) funds. These funds’ prices may fluctuate daily and must always be displayed out to four decimal places.

Both the short-term low volatility funds and public debt funds are subject to the most conservative daily and one-week liquidity minimums, as well as liquidity fees or temporary gates on withdrawals if a fund’s liquidity and/or redemption levels meet certain thresholds. By contrast, variable NAV funds are not subject to these new provisions.

The low volatility funds are seen as the “missing link” between constant NAV and variable NAV funds and in most market conditions will offer a stable unit value, says Alastair Sewell, senior director for fund and asset management at Fitch Ratings.

“People have generally shown a preference for the LVNAV fund type because the end user experience in normal markets will be much closer to the former CNAV (prime) or stable funds,” Sewell notes.
As of April 19, many investors in CNAV funds had switched seamlessly out of their original prime funds into the low volatility funds, Fitch data show. The ratings agency is forecasting positive euro money market fund rates by the end of 2020.

By the end of May, the low volatility LVNAV funds accounted for 83% or EUR548.7 billion of the European money market fund marketplace. Another 13% or EUR84.7 billion was in public debt CNAV funds and the remainder was in variable NAV funds.

Outflows this year were broadly stable and not unusual in the context of temporary seasonal fluctuations, Fitch said. The funds’ net asset values also have not shifted much because market conditions are benign.

“The broad blip is muted,” said Sewell. If anything, more of a risk of outflows could come from the lagging effects of US tax reform and the potential for investors like US corporations to redeem cash held overseas in Europe and repatriate that in the US, he adds.

GROWTH STORY

Some important lessons in Europe were adopted from similar regulations implemented in the US money market fund industry in 2016, which caused investors to pull around $1 trillion from prime funds in favour of government-only funds.

Since then, money has slowly started to come back into US prime funds, given a more favourable US interest-rate environment and comfort around small price variations in institutional money funds. But as of June 4, US prime funds still hold only $659.3 billion in assets, according to iMoneyNet, versus $1.5 trillion in October 2015 one year before the US compliance deadline.

The Europeans “have been a little bit more creative” by adding the new low volatility fund option, which was not an option in the US reforms, notes Jonathan Spirgel, Global Head of Liquidity and Segregation Services for BNY Mellon Markets.

Their underlying goal was the same but U.S. regulators adopted a tougher stance because the market there, at roughly $3 trillion, is almost three times the size of Europe’s. There is also a cultural element to the EU’s efforts in that market participants in the region are more accustomed to gates and fees because they are embedded in the Undertakings for the Collective Investment in Transferable Securities (UCITS) directive that governs many money market funds.

Although the European experience has been more seamless than the US one, there were roadblocks along the way, most notably the future of a mechanism that enabled funds to retain their stable unit value while interest rates in the bloc are negative. This mechanism, called the share cancellation mechanism (SCM) or reverse distribution mechanism (RDM) – worked by canceling shares to maintain a stable value per share.

In what some called a surprise eleventh-hour move, the regulators said the mechanism was no longer
“On the date of changeover it was just like a normal business day”

MICHELLE PRICE, ASSOCIATION OF CORPORATE TREASURERS

-compatible for negative yielding funds, and required the industry to remove it. On one side was Luxembourg’s Commission de Surveillance du Secteur Financier (CSSF) and the Central Bank of Ireland who were in favour of the mechanism and on the other was France’s Autorité des Marchés Financiers, which reportedly opposed it in alignment with the European Commission.

The European Securities and Markets Authority (ESMA) that was rolling out technical standards for the new money market reforms sided with the Commission and announced in December, 2018 that the mechanism would no longer be permitted. Institutions asked for a six-month extension to implement the change, but ESMA granted only two months, putting it right over the top of an earlier deadline for Brexit negotiations.

As the dust settles, investors have a multitude of products to choose from. Despite all the reforms, money market funds continue to provide institutional and retail investors with daily liquidity, diversification, competitive yields and stability of principal, according to Tracy Hopkins, Chief Operating Officer of BNY Mellon Cash Investment Strategies at BNY Mellon Investment Management.

“Assets continue to stay in the asset class they were in prior to reform, and from that perspective, EU market funds continue to grow, despite all the noise,” she notes.

BNY Mellon is the corporate brand of The Bank of New York Mellon Corporation and may be used as a generic term to reference the corporation as a whole and/or its various group entities. This material and any products and services may be issued or provided under various brand names of BNY Mellon in various countries by duly authorized and regulated subsidiaries, affiliates, and joint ventures of BNY Mellon, which may include any of those listed below:

The Bank of New York Mellon, a banking corporation organized pursuant to the laws of the State of New York, whose registered office is at 240 Greenwich St, NY, NY 10286, USA. The Bank of New York Mellon is supervised and regulated by the New York State Department of Financial Services and the US Federal Reserve and is authorized by the Prudential Regulation Authority (PRA). Details about the extent of our regulation by the PRA are available from us on request.

The Bank of New York Mellon operates in the UK through its London branch (UK companies house numbers FC005522 and BR000818) at One Canada Square, London E14 5AL and is subject to regulation by the Financial Conduct Authority (FCA) at 12 Endeavour Square, London, E20 1IN, UK and limited regulation by the PRA at Bank of England, Threadneedle St, London, EC2R 8AH, UK.

The Bank of New York Mellon SA/NV, a Belgian limited liability company, registered in the RPM Brussels with company number 0806.743.159, whose registered office is at 46 Rue Montoyerstraat, B-1000 Brussels, Belgium, authorized and regulated as a significant credit institution by the European Central Bank (ECB) at Sonnenmannstrasse 20, 60314 Frankfurt am Main, Germany, and the National Bank of Belgium (NBB) at Boulevard de Berlaimont/de Berlaimontlaan 14, 1000 Brussels, Belgium, under the Single Supervisory Mechanism and by the Belgian Financial Services and Markets Authority (FSMA) at Rue du Congrès/Congresstraat 124, 1000 Brussels, Belgium for conduct of business rules, and is a subsidiary of The Bank of New York Mellon.

The Bank of New York Mellon SA/NV operates in Ireland through its Dublin branch at Riverside II, Sir John Rogerson’s Quay Grand Canal Dock, Dublin 2, D02KV60, Ireland and is registered with the Companies Registration Office in Ireland No. 907126 & with VAT No. IE 9578054E. The Bank of New York Mellon SA/NV, Dublin Branch is subject to limited additional regulation by the Central Bank of Ireland at New Wapping Street, North Wall Quay, Dublin 1, D01 FX73, Ireland for conduct of business rules and registered with the Companies Registration Office in Ireland No. 907126 & with VAT No. IE 9578054E.

The Bank of New York Mellon SA/NV is trading in Germany as The Bank of New York Mellon SA/NV, Asset Servicing, Niederlassung Frankfurt am Main, and has its registered office at MesseTurm, Friedrich-Ebert-Anlage 49, 60327 Frankfurt am Main, Germany. It is subject to limited additional regulation by the Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, Marie-Curie-Str. 24-28, 60439 Frankfurt, Germany) under registration number 122721.

The Bank of New York Mellon SA/NV operates in the Netherlands through its Amsterdam branch at Strawinskylaan 337, WTC Building, Amsterdam, 1077 XX, the Netherlands. The Bank of New York Mellon SA/NV, Amsterdam Branch is subject to limited additional supervision by the Dutch Central Bank (‘De Nederlandsche Bank’ or ‘DNB’) on integrity issues only (registration number 34363596). DNB holds office at Westeinde 1, 1017 ZN Amsterdam, the Netherlands.

The Bank of New York Mellon SA/NV operates in Luxembourg through its Luxembourg branch at 2-4 rue Eugene Ruppert, Vertigo Building - Polaris, L-2453, Luxembourg. The Bank of New York Mellon SA/NV, Luxembourg Branch is subject to limited additional regulation by the Commission de Surveillance du Secteur Financier at 283, route d’Arlon, L-4150 Luxembourg for conduct of business rules, and in its role as UCITS/AIF depositary and central administration agent.

The Bank of New York Mellon SA/NV operates in Italy through its Milan branch at Via Mike Bongiorno no. 13, Diamantino building, 5th floor, Milan, 20124, Italy. The Bank of New York Mellon SA/NV, Milan Branch is subject to limited additional regulation by Banca d’Italia - Sede di Milano at Divisione Supervisione Banche, Via Cordusio no. 5, 20123 Milano, Italy (registration number 03351).

The Bank of New York Mellon SA/NV operates in England through its London branch at 160 Queen Victoria Street, London EC4V 4LA, UK, registered in England and Wales with numbers FC029379 and BR014361. The Bank of New York Mellon SA/NV, London branch is authorized by the ECB (address above) and subject to limited regulation by the FCA (address above) and the PRA (address above).

Regulatory information in relation to the above BNY Mellon entities operating out of Europe can be accessed at the following website: https://www.bnymellon.com/RID.

The Bank of New York Mellon, Singapore Branch, is subject to regulation by the Monetary Authority of Singapore. The Bank of New York Mellon, Hong Kong Branch, is subject to regulation by the Hong Kong Monetary Authority and the Securities & Futures Commission of Hong Kong. The Bank of New York Mellon, Australia Branch, is subject to regulation by the Australian Prudential Regulation Authority and is exempt from holding an Australian Financial Services License. The Bank of New York Mellon is regulated by the New York State Department of Financial Services under the New York Banking Law which is different from Australian law. The Bank of New York Mellon has various other branches in the Asia-Pacific Region which are subject to regulation by the relevant local regulator in that jurisdiction.

The Bank of New York Mellon Securities
Company Japan Ltd, as intermediary for The Bank of New York Mellon.

The Bank of New York Mellon, DIFC Branch, regulated by the Dubai Financial Services Authority (DFSA) and located at DIFC, The Exchange Building 5 North, Level 6, Room 601, P.O. Box 506723, Dubai, UAE, on behalf of The Bank of New York Mellon, which is a wholly-owned subsidiary of The Bank of New York Mellon Corporation.
