REF: Dealer Code and "Redemption Fees"

Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. Contact a financial advisor or visit Dreyfus.com to obtain a prospectus, or summary prospectus if available, that contains this and other information about the fund, and read it carefully before investing.

RISKS

Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. **Bonds** are subject to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. **Currencies** can decline in value relative to a local currency, or, in the case of hedged positions, the local currency will decline relative to the currency being hedged. These risks may increase fund volatility. The use of **derivatives** involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid, and difficult to value and there is the risk that changes in the value of a derivative held by the portfolio will not correlate with the underlying instruments or the portfolio's other investments.

The Dreyfus Corporation and MBSC Securities Corporation are subsidiaries of The Bank of New York Mellon Corporation. ©2018 **MBSC Securities Corporation**, distributor, 225 Liberty Street, 19th Floor, New York, NY 10281.
